I. INTRODUCTION

Lord Prof. Momchil Dobrev and Lady Prof. Mariola Garibova developed in 2006. Theory of socio-humanism, which theory represents a social system of political, social, economic, humanistic management of society that opposes the modern capitalism of the global Masonic mafia elite and its deep rule and deep state. Theory of socio-humanism puts the government on a new principled basis, both the political governance of a country in the modern world and the new economic governance in a country based on the new principled basis, the new governance in the judiciary, the new governance in the ecological system, the social system, the system of education, health care, climate and ecology, culture and a system of direct control of the whole system - through a system of direct democracy. The theory of socio-humanism is a critique of modern global neoliberal capitalism and its structure of government both in each country and at the international level and provides a solution for creating a new social system - more harmonious and humanistic and centered on man's ecological system. in which he lives.

Theory of socio-humanism puts new principles the whole government of a country in accordance with the ecological system, and the creative, creative qualities of each person, a new economic system, a new social system, a new ecological system related to man, a new political system of direct democracy and governance through referendums. Lord Prof. PhD PhD Momtchil Dobrev-Halachev and Prof. Mariola Garibova-DObreva developed 2006 "Theory of degree of justice / injustice /" based on their practice in court, prosecution, state and especially the practice of Prof. Mariola Garibova-Dobрева as a judge with decades of experience as such as a civil and criminal judge . Prof. Momchil Dobrev co-founded 2003 Theory of Corruption and Theory of the Mafia and Theory and Practice of Mafia, which contribute to clearing the Theory of the Degree of Justice / Injustice. In the year 2001 Lord Prof. Momtchil DObrev developed the Theory of the mafia and Theory of corruption . All the both theories has been developed by analyzing of the mafia and the corruption all over the wprld. In Bulgaria, germany, European Union, and other countires. In the year 2010 Lord Prof. Momtchil Dobrev developed the 'Theory of Mafiotismus' as a new type of government oriented solely in the private interests of individuals and private institutions.

In this article we define the basic principles of the SOCIETY created on the basis of the Theory of Socio-Humanism of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева and the differences of this society with

the current global neoliberal capitalist society ruled by the global Masonic mafia elite and its deep and a deep state.

Introduce the Problem : The problem of the crisis of the current capitalist global neoliberal society is enormous and leads to the real demise of our civilization. This system of a new society will provide a real rest of civilization and the preservation of this civilization. This system completely replaces the capitalist system which is the real cause of the crises of society, the creation of inequalities, the robbery of entire countries, peoples, consumers of a global Masonic mafia elite that governs countries all over the world through a deep government and a deep state.

Briefly about the reality in the capitalist global neoliberal society currently ruled by the global Masonic mafia elite and its deep management and deep state

The current conditions on the planet are not good.

People suffer deprivation, restrictions, poverty, hunger, disease, drinking water problems, wars, terrorism, devastation, climate change, refugees, increased mortality, increased demographic crisis, low health care, poor and inhumane medicine, abandoned children, child labor, use of children for organs, misery, low pay of workers. At the same time, high taxes, high utility prices, high prices for electricity, water, energy, Capitalist class society stratifies class society.

There are different classes such as - working poor, unemployed poor, poor, middle class, elite - rich elite.

The unemployed poor are those who cannot find a job, do not have a home, and have enough income to cover their expenses.

They cannot pay for their basic needs either.

Capitalism created and ruled by the global Masonic mafia elite cannot stimulate the unemployed poor, the working poor, they cannot develop. Capitalism, ruled by the global Masonic mafia elite, is the driving force of the ego and of capital, of money, of profit.

The goal is profit, income as high as possible, which is not based on any morality, honor, dignity, ethics, value system.

The fear of survival leads the working and unemployed poor to greed, unscrupulousness, striving for dominance, domination over others, profit at any cost.

The unemployed poor are an example to the working poor, and to the working class what awaits them, what will happen to them if they stop working and if they stop fulfilling their obligations to their employer.

Fear is the main motivation for everyone to look for a job, even one that does not meet their qualifications, expertise, experience, without setting conditions for what job they will get.

Fear spreads from the working poor to the poor, the middle class. Each lower class is an example of each upper class and stratum.

In reality, no one cares about the interest of humanity.

It is there is no welfare of people working in this way.

Each lower class serves as a fear example for each upper class.

This distorts human nature and the value system, and builds a distorted view of the value system of humanity.

It is a person who is at a higher level is more important than a person who is below that level.

Global neoliberal capitalism evaluates man according to his level, without being interested in his spiritual development and the meaning of his life and his existence.

Six categories of value systems must be distinguished:

- Personal value system / spiritual inclusive
- Spiritual value system public values
- A career value system that is not based on anything human
- Family value system
- Cultural value system
- Social value system

The creation of a level of poor, unemployed poor, unemployed poor, poor leads to and is the basis for the commission of crimes by representatives at these levels. They not only can and do commit crimes, but also various violations.

They are susceptible to influence, to manipulation, to control, to influence, to management.

In addition, these strata are the needs of social services.

Social services, the judiciary, health care, education work in this direction are designed to create fear.

Most people succumb to lower and unethical moral attitudes.

The individual is concentrated on not falling from class to lower class. As well as move to the upper class. He is interested neither in the environment nor in what is happening.

Maslow groups human basic needs into five levels:

1. Physiological needs - necessary for life, such as food, water, shelter, clothing, sex, recreation.
2. Need for security - they provide physical and mental protection to the person and give him confidence, reliable work, pension system, working conditions and others.
3. Needs of commitment - those that involve someone or something - friendship, family, love, group participation, grind in an organization and others.
4. Needs of respect - and self-esteem - through which a person feels a person who is useful and important to himself and others. Confidence, status and aspirations.
5. Need for self-realization - a need that allows a person to express and develop their full potential.

This determines the respective strata of human society.

This pyramid of needs and opportunities is really responsible for c

This determines the respective strata of human society.

This pyramid of needs and opportunities is really responsible for the ability of man to participate in society.

Provided that a person strives to satisfy his physical needs because he receives a salary with which he can only pay his expenses and there is little money left to live on, then he is not interested in satisfying the above needs.

PYRAMID OF SURVIVAL AND LIFE

- 1 /. Satisfying the needs for life, food, survival
- 2 /. Satisfying the family, creating one
- 3 /. Satisfying the need for security, personal, family
- 4 /. Satisfaction of the status of respect depending on the achieved position and realization in the capitalist society.
- 5 /. Satisfying creative and other abilities.

Depending on the satisfaction of these needs, the person is in the respective stratum.

Satisfying one need leads to a desire to satisfy the other, which is at a higher level. But this relocation is associated with the availability of adequate monetary resources per month, outside the cost of meeting basic needs. If the corresponding resource is minimal, then the corresponding need is not satisfied. If a need is not satisfied, then the person remains at this level a layer of interests, desires, opportunities. If there is not enough money for the entry of the next need, then it remains in the lower level. A person who strives and struggles to satisfy his physical needs really cannot and does not have the time, the opportunity, the interest and the desire to be interested in politics, real politics, policy implementation, the political system, whether a party performs its.

It is this restrictive line that limits a person's ability to be interested in power, politics, activities related to the distribution of public goods, theft, scams, crimes by people in power.

The need for self-transcendence is the desire to indulge in a higher goal related to spirituality and altruism, it is related to the corresponding monetary available excess threshold. These are the real levels of opportunities and desires of the respective people, representatives of these levels, to be interested in politics, in a political system.

Everyone is at one of these levels and depending on these levels is the opportunity to participate in the management of society or not to participate in the system, government and others, or even be interested in it.

Global neoliberal capitalism does not stimulate the individual to be interested in what is applied by what he has created and how it is useful for the whole society. This capitalism is not interested in satisfying the needs of the individual, it must satisfy its needs through its income and money. However, the needs may ultimately be different depending on its value system. People in capitalism are kept under control, under management, under manipulation, man must produce, he is a necessary resource for production. The goal of man is to satisfy his needs for himself and his family without complying with his value system, morals, honor, dignity, conscience. The purpose of this capitalism is not to expand the consciousness of man to ever-comprehensive forms of community and society. The goal is to satisfy only the ego. Global neoliberal capitalism undermines and destroys human human ideals. This capitalism does not aim for abundance for all. Capitalism does not create lasting harmonious ties for cooperation, the system and a single organism in society.

Capitalism creates only competition and opposition between people of any value system.

CAPITALISM governs man with the system of fear, repression, extortion, manipulation.

THE FEAR OF SURVIVAL is a key feature of capitalism.

It is difficult to survive.

Capitalism has developed only those high technologies and scientific discoveries that allow management, manipulation, control of people.

Global neoliberal capitalism and its ruling global Masonic mafia elite with its deep rule and state hide scientific discoveries that will provide free energy, new medicine, new medical care and tackling the most terrible diseases of mankind.

This capitalism hides scientific discoveries that are good for human existence.

This capitalism maintains excessively high prices - electricity, water, electricity.

Capitalism rules for the sole purpose of making huge profits.

There is a constant race for profits, control, people management.

There is a constant enrichment of a minority of the oligarchy, of Freemasons from the deep state and deep government.

The lives of billions of people are being devalued, human rights are being violated.

There is no predictability, no security, no satisfaction in life, both spiritually and in two ways.

There is no security in society, no justice.

There is a violation of the rights and freedoms of citizens.

Nobody cares about the value of human life. Ie human life has no value.

Healthcare, education, medicine are aimed at the oligarchs,

The economy is aimed at increasing the welfare of a unit of people, the oligarchs.

Satisfaction of goods for every citizen is not pursued.

No one aims to improve the lives of the population.

There is no quality medicine. There is no access to medicine, no security for a normal income and life. There is no access, no equal opportunities for education and qualification.

People aim to satisfy their minimum subsistence, satisfy only their primary needs for securing their lives, but not other goals and motives.

One has no security, no protection in society, from laws, from order.

People are not looking for anything unreal, impossible for their right.

People want what belongs to them and what is not given to me by society and government.

People want peace and peaceful coexistence.

People want to meet their basic needs.

The problems of the consumer society of this global neoliberal capitalism run by the global Masonic mafia elite are enormous.

This can no longer continue. Value orientation is focused only on making money and profits in any way.

Consumer society leads to regression, disintegration, of human values, values, moral and ethical values, There is no real guarantee of rights and freedoms

This leads to destruction and self-destruction.

Consumer society leads to regression, disintegration, of human values, values, moral and ethical values, There is no real guarantee of rights and freedoms

This leads to destruction and self-destruction.

The consumer format leads to a dead end, to decline.

Civilization needs new horizons, new freedoms, equality, justice, without inequalities.

We must create a new era of the existence of humanity, which will fill with a new value content of our lives, of our existence.

Only by creating a new system - new principles will humanity survive and survive. Respect and appreciation of human life is the most important thing in this new era.

The person should be given opportunities for happy existence and understanding of the purpose, mission, meaning of his life.

Building a society of MAN and HIS HUMANITY in the center of the ecological system - man nature, planet.

The new society must be a society of creation, of creativity, of development. Progress is possible only with the participation of all people in the creation of a society of creators, personalities - creators with honor, dignity, conscience, justice.

The goal is to improve the whole world, the whole environment, all societies,

The goal is human evolution, which requires an appropriate structure, rules, laws.

At the moment, no one believes in the prosperity of society, in the justice of society, in the equality of people, in their independence and equality.

Only lies, fraud, manipulation by politicians. No one believes in progress, development, evolution, development. Improvement.

No one believes in economic, technical, spiritual, progress,

Rich and poor, division of people, inequality of people.

They do not believe that prosperity encompasses all people and individuals.

That is why the poor and poverty are increasing.

Mankind is constantly dreaming of change and improvement.

The consumer society is at a dead end.

The consumer society develops hidden forms of slavery, indebtedness, inequalities.

This is a real disguised slave system.

The goal is spiritually free people and a corresponding society.

This society guarantees a dignified life, public goods and spiritual and moral development.

There is talk pro forma about ideals, about sublimity, but in reality it is a jungle.

The mafia and the global Masonic mafia-dominated elite ruled by capitalist society are fighting for territories, resources, assets, the conquest of a consumer society from which to make huge profits.

Everything that exists in modern society is real against man and his real spiritual essence.

After all, here we are talking about and only about interests that are based on money, on power, on making profits.

In reality, this is not about protecting the interests of the whole society, but only of a group of people who control money, finances, government - the DEEP STATE AND THE GLOBAL MASONIC MAFIOTIZED ELITE €

In reality, people have handed over their rights and freedoms to people with capital and finances, but in reality, with this transfer of freedoms and rights, people have also handed over public goods, which accumulate in a group of people.

What is needed is a process of returning these goods - which are ultimately societies - to society as a whole. In reality, man has lost his status as a man with his soul.

In the current society of global neoliberal capitalism, lies, slander, untruth, meanness, betrayal, selfishness rule.

Relationships between people relate only to benefits, gains, interests.

The real human nature of human relationships is lost.

In reality, Deep Governance and Deep State use the following undemocratic models of governance as follows:

- Autocracy
- Oligarchy
- Plutocracy
- Kleptocracy
- Corporatocracy
- Cryptocracy

All these systems of government are managed on the basis of the principles of MAFIOTISM and the Financial Bank Resource Technological Mafia Materialism.

IV. WHAT A DEMOCRACY DEPENDS ON - REALITIES, IMPORTANT FACTORS FOR THE GOVERNANCE OF DEMOCRACY, PRINCIPLES OF DEMOCRACY

An essential feature of democracy is equality and freedoms.

Equality of all citizens before the law and equal access to power

In a representative democracy, all votes have equal weight, the possibility of citizens to become representatives is not limited, the freedom of citizens is ensured through legally established rights and freedoms.

Democratic systems contain internal mechanisms for separation of powers, unequal distribution of power, and potential violations of democratic principles by individual institutions.

This opposes democracy "government of the rulers", with an alternative system - monarchy, oligarchy - and timocracy. Right to participate in political life. Agreement between the rulers and the ruled - the voters. Direct democracy - selectivity of certain government positions.

Democracy is a way of life - with established social, economic and political equality

The word democracy comes from the ancient Greek language meaning "democracy."

The leading role is played by the people.

Lincoln's phrase addresses two aspects of democracy:

First, it answers the question "who rules" - the people, directly or through persons elected by them

The second answers the question "how is it governed" - a way in which governing activities are carried out by the people for the people.

In connection with the question of who governs the problems of democracy, they are in connection with the subjects - people, class, stratum, state.

The rules and principles of people's participation in politics and governance.

An essential concept for management is:

- Procedures - the rules for the governing political process
- Substantive - effective. The result of democratic governance -
- both rights and obligations

MORALITY AND DEGREE OF MORALITY : Morality is the distinction between intentions, decisions, and actions against those that are good and right and those that are wrong and bad. Morality is an essential part of the standards and principles that are derived from the code of ethics of the respective guild and in a democratic society. Degree of Morality - "honesty", "integrity", "justice", "kindness", "right", "conscience". However, moral norms and principles in a democracy are uniform, although there are different moral systems. After the law, morality is the second source of law in countries that have adopted the continental legal system. If such a morality with the respective qualities is missing, then there is no right and the law is not realized, is not realized, is not fulfilled. Ethics, on the other hand, is a branch of philosophy that deals with moral issues. Ethics includes and encompasses the moral principles of a society, culture, person, group. Morality is limited as a system of duty, obligation, principles of conduct, justice. On the other hand, morality contains a value system. This value system is a set of ethical values of a person, organization, society, group, which represent a standard for human behavior in all situations - group, family, society.

DEGREE OF INJUSTICE in a society - depends on the degree of MAFIOTISM in a society, the degree of corruption among law enforcement agencies and those involved in passing laws, the degree of trust of civil society in all participants in government - court, prosecutor's office, how and whether judges and prosecutors comply with the law, enforce the law, apply the law, do not enforce, violate the law prosecutor's office, state, municipalities.

The DEGREE OF DEMOCRATIZATION OF A SOCIETY depends on the respective DEGREE OF UNJUSTICE / JUSTICE.

FAIR FORMULA / INJUSTICE:

JUSTICE / INJUSTICE = POWER + Influence + Relationships + Interests + MONEY / AND + Mafia structure / internal or external / + Monopoly rights / rights + laws / rules / practices / procedures + possibility to make an alternative decision - Obligation - Responsibility - morality ethics - observance / application / implementation of the law by judges / prosecutors / statesmen - Control / Sanctions - Corruption - Mafiaization - TRUST / DEGREE OF TRUST.

V. BASIC PRINCIPLES OF HUMAN SOCIETY ESTABLISHED ON THE BASIS OF THE THEORY OF SOCIO-HUMANISM BY PROF. MOMCHIL DOBREV AND PROF. MARIOLA GARIBOVA-DOBREVA DIRECT DEMOCRACY IN ALL AREAS AND AT ALL LEVELS

At the center of this society, created on the basis of THEORY YANA SOCIO-HUMANISM of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva, is man and the environment in which he lives, which is part of him and inextricably linked to him.

Human life and its value and its guarantee.

Guarantee of life - every person is guaranteed security of basic necessities of life, including, food, housing, health care, medical care, education, social security. The scientific, production and technological activity of the society must be directed mostly and only to the improvement of the quality of human life in the respective ecological environment. Politics and economics must ensure economic stability, no inflation, any crises, stable, equal, comparable prices around the world, a fixed minimum taxation, a stable currency that is independent of inflation, crises, etc., and the corresponding rate of return for the respective goods, which is the basis of governance in a society.

This is the highest value, the goal of a society is to preserve and guarantee and ensure the value life of every person. There is nothing more precious than human life,

2 /. Human rights and freedoms : All human beings are born free and with the same rights as human beings. Everyone has the right to choose, everyone has rights and freedoms, and society must protect these rights and freedoms of all citizens. These rights and freedoms are for everyone and not for certain classes, groups of people. No one has the right to take away people's rights and freedoms. No one has the right to threaten these rights and freedoms with his decision - be it government, community and others. This includes the fundamental right to political equality, not only in other respects.

3 /. Human security and safety : No one has the right to threaten man and his security, no one has the right to threaten man and his rights and freedoms. The system and society must protect it.

4 /. UNIFORM WORLD SERVICE FOR GUARANTEE OF PEACE, fight against emergencies. Representatives of such countries as the United States, China, Russia, Germany, Great Britain, France will take part in this council, which will guarantee and ensure peace on the planet.

5 /. There is generally available information for everyone about everything that is available in society. Everyone should have the opportunity and access to receive full information about everything - about society, about policies, about the budget, about the funds spent, about public projects, about investments in society, about movement, the distribution of public goods, the distribution of public goods. public money. Everyone should have access to all the information about how the decisions of the society, the tasks, the plans of the society are implemented. Independence of the media - mandatory presence of public media to provide such access and to provide complete information to the public.

6 /. System of development of human creative abilities and their satisfaction : Society to man, for his development and existence in the spiritual and any other sphere in the respective ecological system, which is connected in the system man, nature, planet. Society to man, his development and existence, in full, spiritual plan, material plan, social plan, ecological plan The ideology - the system must be to create conditions for the care of man, for his development - both spiritual and material, spiritual, social, environmental sphere, to meet all his needs from the Maslow pyramid fully and comprehensively.

The main priority of the SOCIETY BASED ON THE THEORY OF SOCIO-HUMANISM is the development of man, his spirituality, respectively his development in the professional sphere, in the spiritual sphere, development of his abilities, discovery of his personal abilities, development of these abilities, their manifestation in society. Raising a high pedestal of moral, ethical values of man, spiritual and moral aspirations and desires of man, humanity, mutual respect, self-esteem, development of human relationships. Education of man in the moral and ethical values of society, stimulation of the moral and ethical values of every person. Creating conditions for the inclusion of the individual in and with society, and for the development of the individual. Everyone in this society has the right, opportunity, access and freedom to develop, to develop their abilities, has the right to development and self-realization, Creating conditions for the development of creative abilities and gifts of man at any age. Raising a pedestal of human spiritual development. Education should not only be accessible to all, possible for all, and free and equal, but such education should be for the person throughout his life. Education after secondary education, education among higher education, education after 25 years to his pigsty in which to allow a person to develop, develop and discover his new abilities creatively, and to support such development and realization by society. Society guarantees and creates conditions for the realization of human creativity in every field.

7 /. Justice, Equality., All natural resources belong to society and man in particular. They are public goods. And they must be distributed equally among all members of a society. Any monopolization of resources is excluded, and any kind of irrational anti-human anti-social use of these resources is excluded. Resources are distributed fairly among all members of the community. Everyone is guaranteed employment at his or her request. Wages are the same in every society for the same specialty, profession, position, qualification, Everyone has the right to private property and income, as well as from an activity corresponding to his activity. This society guarantees justice in society at all levels of the organization of society. In this society guarantees full justice and solves the problems of justice / injustice described in the previous chapter.

8 /. Referendum democracy system : Citizenship . Everyone has the right to participate in the government of the respective state and society, to participate in the respective adoption of laws, for the improvement of people's lives, for the implementation of laws, for the adoption of the respective budgets for realization of goals, plans, for adoption of plans for development in all spheres of society. The solution of all tasks concerning society, in the social sphere, in the ecological sphere, in the economic sphere, and in all other spheres will be considered by referendums, which may be attended by appropriately educated people who will have a minimum level of education.

9 /. Labor system. Everyone has the right to work and to work. He works depending on qualification, specialization, profession, experience. In the system of the society based on the Theory of Socio-Humanism of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobrev, each person will have the right to work 3 days a week, and in the other two days of the week he must develop, participate in various courses for retraining, for development, for training in specialties and subjects that interest him and develop his creative abilities.

Every two days a week, each person must deal with their personal development in various specialties, professions, creative abilities. If someone does not want to work, he will be provided, he will be guaranteed medicine, health care, education, social activities in the minimum amount, but there will be a requirement to train, develop and discover their other abilities, which may possibly be realized at a later stage.

10 /. The economic system in the Society based on the Theory of Socio-Humanism of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobrev

Apart from the fact that in every country there must be a direct democracy and a system of drawing lots for professional positions, control at any level, control in every field and every ministry that is specialized. The control will be carried out by councils on a rotating basis by qualified specialists with the respective status - selected by lot from the citizens. The control will be performed regarding the activities performed under the respective plan - programs, and control of the respective budget of the respective activity. In the Economy, all companies that provide basic resources - such as electricity, water, electricity, gas, oil, gasoline, other raw materials - must be state-run companies. Companies producing basic foodstuffs and foodstuffs must be state-run companies, which will be managed by the relevant ministry at the rate of profit.

THE PROFIT RATE INDICATOR will determine the limits of the prices of goods on the market, which will ensure fairness of the prices of goods necessary for human existence. It will be possible to form joint companies

in public-private partnership, which will deal with innovations and whose products will benefit the people and the whole society, as the state will determine the rate of profit of the respective manufactured goods and services.

IMPLEMENTATION OF NEW FORMS OF HUMAN RELATIONSHIPS IS IMPORTANT.

EIGHT FUNDAMENTALS OF THE CREATIVE SOCIETY.

ERADICATION OF CRIME.

There is crime where there are conditions for such and its existence.

It is these opportunities that are available from the conditions that cause and generate crime.

Crime is present where there is a need for something, a shortcoming.

If a person has everything, no need, no social protection, then he would never commit a crime.

He really has everything he needs.

When the minimum need of the person is the one available to him, it arises naturally if there are conditions in the person himself for the need to commit a crime.

Therefore, when society satisfies and satisfies all human needs

This is also related to education, healthcare, social system.

THE SYSTEM OF DIRECT DEMOCRACY - THROUGH REFERENDUMS

The current system of government is not a democracy at all, as it is not a real democracy, but rather an aristocratic mafia oligarchy of the global Masonic mafia elite and its deep rule in the deep state. The mechanism underlying this sham democracy is elections. Elections are elected on the basis of citizens' votes.

These representatives, in turn, elect their proxies and representatives in the executive branch. History proves that these representatives represent an elite that is mafia-like, corrupt, that looks only at its own personal interests and, if it enters the relevant parliament, forgets about its promises, and aims and carries out activities that only bring it millions of profits. It is this elite that becomes an aristocratic oligarchy, which really represents and ultimately protects the interests of themselves and the few who give money and bribes, lobby with money and funds, property and others. In the current "democracies", a voting procedure has been adopted and chosen. Really so far. In reality, companies and banks finance both countries in one election - for example, in the United States and the two candidates of the two major parties, and whoever wins after that will work for them again. The current systems cannot be democracies because of the electoral systems and the established system of the global Masonic mafia elite to falsify elections. With the establishment of this type of government in the late 18th century in Britain, then in the United States, and in France after 1789, its creators knew that this had nothing to do with democracy. They had no real intention of creating a demonstration. All these systems were created by a Masonic mafia elite and the deep government and deep state ruled by it. For this Masonic mafia elite, the creation of democracy was really the creation of anarchy, and the rule of the common people. Thus, they create government through representation, which has nothing to do with democracy. They really wanted to end the rule of the aristocracy and replace it with their mafia-style system of government in which they would rule, to draw on the goods.

In reality, democracy is translated as "democracy", and that state power comes from the people for the benefit of the people and is divided into:

- Consensus democracy
- Referendum direct democracy
- Representative democracy through elected representatives

By people is meant the citizens.

Essential characteristics of democracy are equality and freedom.

Equality of all citizens in the law and equal access to power.

The freedom of citizens is ensured through established rights and freedoms in relevant laws.

In a representative democracy, all votes have equal weight, but in reality the ability of citizens to become representatives is limited, their ability to come to power is limited.

In reality, however, there is no real political equality in the current systems.

Equality in representative government is only fictitious, formal, imaginary.

It was clear to the founders of democracy that no one would be overthrown by voting, and that the poor would never take power by voting in elections.

Just because elections are a form of falsification of free choice.

That is why it is convenient for all this global Masonic mafia elite to call this "democracy", which, however, has nothing to do with democracy.

A caste of politicians is being created.

BASIC PRINCIPLES OF DEMOCRACY ARE:The main element that shows the existence of a DEMOCRACY is the TRUE POLITICAL EQUALITY OF THE CITIZENS, which does not really exist at the moment. Not socially, economically, physically, culturally, ethnically, etc. and POLITICAL EQUALITY - EQUALITY IN POLITICAL DECISION-MAKING.

In reality, decisions in a true democracy must be made collectively, through a general assembly of the people and not through its elected representatives.

The Assembly is such a form of general assembly of citizens.

The misuse of the word democracy has really devalued it.

In reality, power is corrupted by this elite, because its value system is not the one guided by morality, honor, dignity, conscience.

The current type of social system, social system, economic system constantly causes crises in every sphere of human activity.

The constantly created and deliberately provoked crises in international relations, politics, economics, education, healthcare are rooted in the main forms of market economy - personal interest and the constant pursuit of ever-increasing profits.

There is a system of organization and management of people's lives from the outside, and they cannot have any control and influence over those who govern their lives. This system is full of contradictions that provoke crises that are actually caused by the global Masonic mafia elite and its led and managed deep government and deep state. People's opinion is ignored, not taken into account, people's interests are violated, public goods are looted, and go to the management of private interests, under the pretext that man can not manage well state-owned companies, property, goods.

On the other hand, egoism, egocentrism, the pursuit of success at any cost and success that brings only profits, income, contribution of money, while ignoring the development of human creative and spiritual abilities, come to the fore.

Only such behavior and value system is tolerated, which leads to profits for certain individuals, companies, for certain interests, political elite, global Masonic mafia elite.

It turns out that a system of government with a high vertical structure and a hierarchical pyramid system of government increasingly ignores the interests of society and people, deletes them, replaces them with their own personal interests for profit.

On the other hand, the creative abilities of the person are suppressed, which does not necessarily bring profit, money, dividends and others.

Such abilities are rejected, ignored.

Apart from the fact that the hierarchical system of government, the vertical structure ceases to serve society and people, it at one point uses all kinds of coercive forms and measures against the people themselves.

"The forms of 'democracy' that we know so far, and which are based on the election of representatives to elect their representatives in power and in vertical hierarchical structures and organization, have nothing to do not only with direct democracy but also with democracy.

The elected representatives elect their representatives, and the control, accountability, responsibility, dependence of the respective representative of the representatives on the choice of the citizens is actually lost.

This is an imaginary democracy.

An alternative to the current democracy is direct democracy.

They build institutions that ensure that every member of society can participate directly in decision-making at the political, economic, social, environmental, cultural and all levels.

Capitalism generates a consumer society whose value system is quite low, whose value system satisfies only the lowest human needs of Maslow's pyramid, where the most important are the ego, money, profit in money.

The direct democracy of the Theory of SOCIO-HUMANISM places man and the whole system in which man lives environment, ecological environment - planet, plants, animals, people at the center of this system.

The impact of these decisions on both the social system and the ecological system of the planet is always considered in decision-making.

In addition, the system of direct democracy of SOCIO-HUMANISM imposes on the one hand referendums on the choice of:

Program plan for a specific period. These plans-programs concern - public life, economy, social system, healthcare, education, internal and external security, external political and economic and international relations, the innovation system, the system of establishing state and / or state / private partnerships.

Need to change laws, create new laws.

Budgets for the implementation of these plans - programs for a specific period.

On a rotating basis, qualified personnel are selected by lot to implement and implement these plan-programs, and these qualified personnel have precisely defined for this position capacity, knowledge, experience, achievements and others. As the choice of these shots is for a specific time. For this period of time, these frames are reported before the period during the period, at the end of the period and after the period.

These qualified staff have **SHORT AND NON-RENEWABLE TERMS** - the powers must be given for a short period. One-time and short terms.

EQUALITY - POLITICAL, SOCIAL, SOCIAL IS THE CORE OF DEMOCRACY AND ITS SINGLE CONDITION.

Because power corrupts, ie. those in office will not have the opportunity to corrupt themselves.

CONTROL of the implementation of these adopted plan programs in each area.

The control is from every citizen, constant access to the information about the plan-programs, their implementation.

CONTROL - before the term, during the term, at the end of the term, after the term.

CONTINUOUS ACCOUNTING

SANCTIONS - recall,

CONTROL LEVERS FOR RESPONSE TO

INSTITUTIONS OF DIRECT DEMOCRACY

The institutions are organized on a non-hierarchical basis.

The political, economic, social, ecological system are organized on the principle of self-government, control by citizens, accountability to citizens at any time, appropriate system of acceptance of these actions, sanction of actions that do not lead to the respective results, responsiveness of management staff.

THE JUDICIAL SYSTEM : Election of the Chief Prosecutor, city, district prosecutors on the basis of referendums cover the relevant criteria and propose the relevant plan-programs

Control, reporting, t responsiveness

INSTITUTIONS OF DIRECT DEMOCRACY : All systems are an arrogant of the system of self-government, and control by civil society of accountability to civil society of the period, respectively a system of sanctions and recall.

On non-hierarchy

Direct democracy is applied in every sphere of the public, political, economic, ecological, social, cultural life of the citizens.

Equality of rights - half-sect equality

An additional institution of political equality is the **RIGHT TO FREE SPEECH**.

In reality, the right to free speech enables every citizen to be a guardian of the public good, the public domain.

IE THE RIGHT TO TAKE THE WORD AND THE RIGHT TO SPEAK IS A BASIC PRINCIPLE IN DIRECT DEMOCRACY.

EVERYONE HAS THE RIGHT TO TAKE THE WORD AT ANY TIME, ON ANY ISSUE.

Everyone can talk.

Purity of democracy

It is also the right to tell the truth, to expose the lie, without having any consequences for the perpetrator.

This is the category - it makes citizens active, responsible for what they say, say. As well as the fact that these opinions expressed and others are important for the relevant institutions.

This helps citizens to be active in the whole process.

The possibility for citizens to be passive, whether out of fear, threats, or other racketeering, coercion, to tell the truth, must be destroyed.

Capitalism is just the opposite and opposite of democracy.

Under capitalism, there is a concentration of capital, human and natural resources in the hands of a small group of people, the so-called global Masonic mafia elite.

The real "democracy" at the moment is the one that belongs and serves the market of the owners of huge capitals, finances and others - the global Muscovite mafia elite - including Rothschild, Rockefeller, Morgan, Soros, Bull Gates and families of the black aristocracy and 13 families ruling the world-.

The capitalist system rests and survives only on this concentration of wealth, money and power.

All their companies have the power to do business that brings huge profits to them.

The lack of democracy also leads to the environmental problems and ecological crisis created by this global Masonic mafia elite.

In SOCIO-HUMANISM the main task is to cover the interests of man, of the ecological system, and of all its inhabitants,

ENVIRONMENTAL SOLUTIONS CLIMATE CRISES AND SOLUTIONS require democracy.
