

An analysis of the paths, means, and methods of imposing a New World Order—based on research conducted since 2001 by Lord Prof. Momchil Dobrev and the 2006 work **Theory and Practice of Seizing Control of the Entire World and Imposing a New World Order** by Prof. Momchil Dobrev-Halachev and Prof. Mariola Garibova-Dobrev—predicted the actual seizure of the sovereignty of European Union member states by and through the European Commission and its President, Ursula von der Leyen. This analysis is grounded in the economic theories of Prince Lord Prof. Momchil Dobrev-Halachev—recognized as a "Great Mind of the 21st Century" (2010), a World Championship winner in Economics (2019), and hailed as the "Father of Modern Finance." His work encompasses the Theory of Mafiotism; the Theory of Financial-Banking-Resource-Technological Mafiotized Materialism; the Theory of the Mafia; the Theory of Corruption; the Theory of Crisis Generation; the Theory of the Degree of Trust; the Theory of the Degree of Truth; the Theory of Crisis Management; and the Theory and Practice of Money Laundering, alongside various indicators and applied economic laws. It also includes theories developed jointly with Princess Lady Prof. Mariola Garibova-Dobrev, such as the Theory of Seizing Control of the World (or a state/union), the Theory of Types of Sovereignty, the Theory of Creating and Managing Inequalities, and the Theory of Creating and Managing... ..poverty; the theory and practice of money laundering through foreign investment; the theory and practice of imposing sanctions for profit; the theory of value and value hierarchies; the theory of social genocide; the theory and practice of the law of double standards/norms; the theory and practice of manufacturing pretexts; the Tuner-Centrifuge Model; the theory of socio-humanism—worthy of a Nobel Prize for quite some time—and the 21 attempts on the life of Prince Lord Prof. Momtchil Dobrev-Halachev since 2011.

¹Prince Lord Prof. Momtchil Dobrev-Halachev, ²Princess Lady Prof. Mariola Garibova-Dobrev

Scientific Research Institute Dobrev & Halachev JSC, Sofia, Bulgaria

ABSTRACT: In 2006, Lord Prof. Momtchil Dobrev-Halachev and Prof. Mariola Garibova-Dobrev developed the theory and practice of world domination aimed at imposing a New World Order. The theory outlines the possibilities and plans for imposing a New World Order dating back to the 19th century, describing every step taken by representatives of the mafia-style materialism—rooted in banking, finance, resources, and technology—to impose this order and seize the sovereignty of all nations. It details the schemes used to establish the New World Order, including the triggering and unleashing of a global pandemic. Momtchil Dobrev and Prof. Mariola Garibova-Dobrev developed the "Theory of Social Human Genocide," a theory that substantiates the plans and actions of the "deep mafia" aimed at reducing the Earth's population, causing illness, and depriving people of healthcare and educational systems, with the ultimate goal of controlling human consciousness. In 2006, Prof. Momtchil Dobrev and Prof. Mariola Garibova-Dobrev created the "Theory and Practice of Creating and Managing Fear." In 2006, they also devised the "Tunnel-Centrifuge-Spiral" scheme, and in 2010, they formulated the concept of "Financially banking resource-based technological mafia-driven materialism"—a form of materialism that has served as a foundational principle since the 17th century. Their other works include the "Theory of Generating Crises" (2008), the "Theory and Practice of Mafiotism" (2010), and the "Theory of the Mafia" (2001). Drawing on these theories, this paper analyzes the origins and triggers of the coronavirus epidemic and examines the consequences, objectives, and potential outcomes of the pandemic for various economies and societies, such as China, the USA, and Europe.

KEYWORDS: Pandemic, coronavirus, economy, politics.

I. INTRODUCTION

In 2006, Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobrev developed a theory and practice for seizing control of the world with the aim of imposing a New World Order. The theory outlines the plans for establishing a New World Order—dating back to the 19th century—and details the steps taken by representatives of the mafia-style alliance of banking, finance, resources, technology, and materialism to impose this order and seize the sovereignty of all nations. It describes the schemes used to enforce the New World Order, including the initiation and triggering of a global pandemic. In the year 2006, Lord Prof. Momtchil Dobrev and Prof. Mariola Garibova-Dobrev developed the "Theory of Social Human Genocide," a theory that demonstrates the plans and actions of the "deep mafia" aimed at reducing the Earth's population, causing illness among people, and depriving them of healthcare and educational systems, with the ultimate goal of controlling human consciousness. In 2006, Prof. Momtchil Dobrev and Prof. Mariola Garibova-Dobrev created the "Theory and Practice of Creating and Managing Fear." That same year, they also devised the "Tunnel-Centrifuge-Spiral" scheme, a mechanism through which social human genocide and the imposition of a New World Order could be realized.

In 2010, Lord Prof. Momtchil Dobrev developed the "Theory of Mafiotism" as a new state-level paradigm based on the private and personal interests of the prime minister, ministers, and the government. Based on this "Theory of Mafiotism," he also developed the concept of "Financially-banking, resource-based, technological, mafia-driven materialism" in 2010, identifying it as the fundamental principle of materialism that has prevailed since the 17th century. In 2001, Lord Prof. Momtchil Dobrev developed the "Theory of the Mafia" and the "Theory of Corruption." Both theories were formulated through an analysis of mafia activities and corruption worldwide.

In 2008, Lord Prof. Momtchil Dobrev developed the "Theory of Generating Crises." This theory was created by analyzing the relationships between countries and examining the causes and consequences of crises. The theory examines all possible options for generating crises. In 2006, Lord Prof. Momtchil Dobrev-Halachev and Prof. Mariola Garibova-Dobrev developed the "Theory of the Degree of Democracy" and the "Theory of the Degree of Justice/Injustice." These were based on their professional experience within the court system, the prosecutor's office, and state institutions—specifically Prof. Mariola Garibova-Dobrev's decades-long career as a civil and criminal judge, and Prof. Momtchil Dobrev's experience observing various types of elections. In 2001, Prof. Momtchil Dobrev had already created the "Theory of Corruption," the "Theory of the Mafia," and the "Theory and Practice of Mafiotism," all of which contributed to refining the "Theory of the Degree of Democracy."

In 2001, Lord Prof. Momtchil Dobrev developed the "Theory of the Mafia" and the "Theory of Corruption." Both theories were formulated through an analysis of the mafia and corruption worldwide—including in Bulgaria, Germany, the European Union, and other countries. In 2010, Lord Prof. Momtchil Dobrev developed the "Theory of Mafiotism" as a new form of state governance oriented solely and exclusively toward the private interests of private individuals and private institutions. The fight against the mafia and corruption in Bulgaria, the European Commission, and the European Union is yielding no results because the mafia operates at the highest state and European levels and acts with impunity. This mafia controls the courts, the prosecutor's office, and all manner of state institutions, and these bodies carry out its orders. Even after nine attempts on the life of Prince Lord Prof. Momtchil Dobrev since 2011—retaliation for his struggle against this mafia—the fight will not cease; as Professor Zhivko Stalev famously said: "A state without the rule of law is a form of organized crime!"

Lord Prof. Momtchil Dobrev-Halachev, PhD, DSc, and Prof. In 2006, Mariola Garibova-Dobrev developed the "Theory of the Degree of Democracy" and the "Theory of the Degree of Justice/Injustice." These theories were based on practical experience within the court system, the prosecutor's office, and state institutions—specifically Prof. Garibova-Dobrev's decades-long career as a civil and criminal judge, and Prof. Momchil Dobrev's experience as an election observer. In 2001, Prof. Momchil Dobrev had already formulated the "Theory of Corruption," the "Theory of the Mafia," and the "Theory and Practice of Mafiotism," all of which contributed to refining the "Theory of the Degree of Democracy." Efforts to combat the mafia and corruption within the private bailiff system in Bulgaria—established in 2006—and related reports submitted to the European Commission and the European Union have yielded no results; this is because the mafia operates at the highest levels of both the state and the EU, acting with total impunity. This mafia con The problem of the mafia and corruption in Bulgaria, the European Union, and the European Commission is immense. We have repeatedly presented evidence regarding the scale of this mafia. Based on the realities of this mafia and the corruption within Bulgaria, the European Union, and the European Commission, Lord Prof. Momchil Dobrev formulated the "Theory of the Mafia" and the "Theory of Corruption"—encompassing all their manifestations—in 2001. Building upon these theories, Lord Prof. Dobrev also defined formulas for the mafia and for corruption.

Furthermore, based on these processes, he developed the "Theory and Practice of Mafiotism," defining the formula for mafiotism and explaining how it operates, how it is organized, and whose interests it serves at the expense of others. Who is Lord Prince Prof. Momchil Dobrev? Born in 1963, he committed an act of "imprudence" in 1982 when, during an interview with the *Narodna Mladezh* newspaper, he declared that the Bulgarian Communist Party and the DKMS (Dimitrov Young Communist League) were a mafia. Following repressions against his entire family—and particularly against his father, Dobri Duchevev Dobrev, a financier who managed conglomerates in sectors such as transport engineering, general machinery manufacturing, and the chemical industry, generating hundreds of millions of leva in profit for the Republic of Bulgaria—Momchil Dobrev was forced to flee in 1984 to the German Democratic Republic to study at the Technical University of Ilmenau. In just one year and three months, Momchil Dobrev completed a five-year curriculum; within a single year, he passed the written exams in physics, mathematics, and all other subjects with distinction. Consequently, as early as February 1985, Prof. Karl-Heinz Gothe invited him to participate in physics experiments that led to the discovery of room-temperature superconductivity. Subsequently, Stoil Stoilov, a secretary at the Bulgarian embassy, threatened to ruin Momchil Dobrev's life if he did not steal the research material—an act for which he was promised 11 million US dollars and a house in the USA, a proposal proving that this diplomat was serving the USA and the CIA. Despite such threats, Momchil Dobrev did not betray his mentors—Professor Karl Heinz Gothe and Professor Manfred von Ardenne (one of the creators of the Soviet nuclear bomb). As early as 1985, following conversations with Momchil Dobrev, von Ardenne hailed him as a future Nobel laureate and a genius of the 20th and 21st centuries. It is no coincidence that at an international conference, Professor Michael Roth introduced Momchil Dobrev to over 500 professors from around the world as "the genius of the 20th and 21st centuries." At that time, Momchil Dobrev was studying a wide range of disciplines, including theoretical physics, biology, neurophysiology, medicine, logic, cognitive psychology, chemistry, various medical fields, brain sciences, and other sciences.

These achievements were not accidental; even as a first-grade student, Momchil Dobrev solved mathematics problems intended for third and fourth graders, and while in the third grade, he solved problems meant for sixth and seventh graders—all without any external tutoring or specialized instruction provided by his family. As the heir to the Dobrev-Halachev dynasty, Momchil Dobrev upholds the principles of honor and dignity associated with the lineage—a dynasty possessing assets valued in the billions. It is no coincidence that Lord Academician Professor Momchil Dobrev holds qualifications as a physicist (with a master's degree in astronomy), lawyer, economist, and engineer; has studied archaeology and archaeometry; and even possesses a license as a construction technician authorized to design buildings. As a scion of the Dobrev-Halachev dynasty, Momchil Dobrev upholds the honor, name, dignity, and assets of the dynasty—assets that have attracted the interest of the MAFIA. It is no coincidence that, as early as 1991, Momchil Dobrev created two free-energy generators based on his theories regarding vortex fields, the field structure of the ether, the composition of the universe, a 16-dimensional universe, 12 levels of consciousness, and the structure of spiritual worlds; he also explained dark matter and dark energy back in 1991, proved that consciousness can travel at speeds far exceeding the speed of light, discovered a new fundamental physical force governing the universe, and revealed that Einstein was mistaken on a number of points in his theories. Corruption and the mafia within a state undermine democracy, freedoms, human rights, and the rule of law. Consequently, Lord Prof. Momchil Dobrev and Lady Prof. Marioal Garibova-Dobrev developed the "Theory of the Degree of Democracy" and the "Theory of the Degree of Justice/Injustice," as well as the "Theory of Socio-Humanism"—a societal model that eliminates the flaws of neoliberalism, globalism, and unbridled market economics, laying the foundations for a NEW HUMAN SOCIETY based on entirely different principles—economic, social, managerial, and otherwise.

As a result of Lord Prof. Momchil Dobrev's ongoing struggle against corruption and the mafia in Bulgaria, the European Union, and the European Commission since 2011, he has survived seventeen (17) attempts on his life and the lives of his loved ones. During President Donald Trump's previous term (2016–2020) and his current term (2025), he was personally informed—both directly and through the US Embassy in Bulgaria—about the state-level mafia presence in Bulgaria, affecting the judiciary, the prosecutor's office, and the government of Prime Minister Boyko Borisov. Yet, there was no reaction from President Donald Trump, despite his public stance as a fighter against the mafia and corruption! President Trump was also informed that the MAFIA in BULGARIA and the EUROPEAN COMMISSION had caused losses amounting to BILLIONS OF US DOLLARS to an AMERICAN COMPANY by stealing its property—the "Bulgarian Posts" company—with no action taken or results achieved for over nine years. We informed President Trump about this mafia again at the start of his current term, yet no action followed from him, even though an AMERICAN COMPANY had suffered losses totaling hundreds of millions of euros. Despite legal proceedings initiated as early as 2022 in international institutions—courts and other bodies—there has been no information to date regarding any overt

support from these courts (such as the European Court of Human Rights, the UN court, criminal courts, or arbitration tribunals). THIS IS PROOF of yet another MAFIA operating within these COURTS and of the SUPPORT GIVEN TO THE MAFIA in BULGARIA, EUROPE, and around the world. All legal cases filed regarding this theft of property belonging to an American company—valued at trillions of US dollars—involving and supported by Prime Minister Boyko Borisov, Chief Prosecutors Sotir Tsatsarov and Ivan Geshev (as well as the current Chief Prosecutor), judges, ministers, and others, have vanished; to date, we have no information whatsoever regarding these cases.

Furthermore, following the filing of a RICO Act lawsuit in the USA in 2023 against former Prime Minister Boyko Borisov, Chief Prosecutors Sotir Tsatsarov and Ivan Geshev, ministers, judges, and private mafia-linked firms, an attempt was made on November 1, 2023, to assassinate Prince Lord Academician Prof. Momchil Dobrev inside the Sofia District Court building. This attempt involved Judge Lyubomir Ignatov and was facilitated by the inaction of the court's presiding judge, Alexander Angelov, as well as ministers, Deputy Minister and criminal judge Dechev, the Prosecutor's Office under Ivan Geshev, and the current Chief Prosecutor, Borislav Sarafov. The fight against the mafia and corruption in Bulgaria, the European Commission, and the European Union is yielding no results because the mafia operates at the highest levels of both the state and the EU, acting with total impunity. This mafia controls the courts, the prosecutor's office, and various state institutions, all of which carry out its orders. Even after nine attempts on the life of Prince Lord Prof. Momchil Dobrev since 2011—stemming from his struggle against this mafia—the fight will not cease; for as Professor Zhivko Stalev says: "A state without the rule of law is a form of organized crime!" The COVID-19 pandemic of 2020 demonstrated a scheme for global domination aimed at imposing a New World Order; it effectively utilized a "tunnel-centrifuge-spiral" mechanism to enforce digital diktat, dictatorship, and "digital mafia-fascism" worldwide.

The scheme employed during the COVID-19 crisis was, in reality, a dress rehearsal for launching the "Deep Mafia's" comprehensive system to impose a "new normal"—and, by extension, a New World Order. It revealed a precise, clear system of manipulation and genocide against humanity and the global population, all with the ultimate goal of establishing this new order. This article focuses precisely on how a supranational institution—the World Health Organization—is being used by the architects of mafia-fascism to implement the plan for a New World Order, taking into account the latest developments from the 77th World Health Assembly (held from May 27 to June 1, 2024).

II. RESEARCH METHOD

The research methods applied to the theories and models developed by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva—specifically the Theory and Practice of World Domination for the Purpose of Imposing a New World Order; the Theory and Practice of Social Genocide; the Theory and Practice of the Types and Degrees of Sovereignty; the Tunnel-Centrifuge-Spiral Model; the functions, tasks, and organization of the World Health Organization (WHO); the goals and practices of imposing a New World Order; the plans, tactics, and practices for imposing a New World Order; and the genocide imposed as a result of analyzing the behavior of governments, the WHO, pharmaceutical companies, scientific institutions, researchers, scientists, doctors, and immunologists—are as follows:

- ✚ Analysis of measures imposed by governments
- ✚ Analysis of government behavior
- ✚ Analysis of the entire process of imposing a New World Order and the pandemic
- ✚ Analysis of the steps and measures within this process of imposing a New World Order and seizing control of the entire world and individual nations by representatives of "Financial-Banking-Resource-Technological Mafiotized Materialism" (mafio-fascism)
- ✚ Analysis of the pandemic situation and related practices

III. ANALYSIS OF THE METHODS, PATHS, AND MEANS INVOLVED IN IMPOSING A NEW WORLD ORDER—BASED ON RESEARCH CONDUCTED SINCE 2001 BY PROF. LORD MOMCHIL DOBREV-HALACHEV.

The plan in question was drafted at the UN, covers the period from 2021 to 2030, and is dated September 21, 2001. This plan is cited by Rabbi Amnon Yitzchak.

The plan dates from September 21, 2001.

1. World Government – WG
2. Cashless global currency
3. World Central Bank

4. Global military force
 5. End of national sovereignty
 6. End of private property
 7. End of the family unit
 8. Decimation of the population – punishment of every 10th person for disciplinary purposes
 9. Control of population growth and density
 10. Mandatory vaccination – for the purpose of biological control and genocide
 11. Universal Basic Income; wages abolished
 12. Microchip implantation for payments and surveillance
 13. Social credit system
 14. Surveillance and biological control device via 5G
 15. Child-rearing by the WG; schools and universities owned by the WG
 16. Elimination of private transport – no private car ownership
 17. All companies become the property of the WG
 18. Restriction of air traffic
 19. Concentration camps – creation of agglomeration centers
 20. Elimination of irrigation systems
 21. Elimination of private farms
 22. Closure of private agricultural pastures
 23. Elimination of single-family homes
 24. Restricted use of agricultural land
 25. Ban on natural... medicines
 26. Ban on natural treatments
 27. Ban on fossil fuels
- To be implemented from 2021 to 2030.

Based on this plan, Lord Prof. Momchil Dobrev-Halachev—recognized as a "Great Mind of the 21st Century" (2010) and a 2019 World Champion in Economics, and dubbed "the father of modern finance"—formulated potential implementation options during November and December 2001. This work drew upon the theories developed by him—both independently and jointly with his wife—including:

- The Theory of Mafiotism,
- Theory and Practice of Financial-Banking-Resource-Technological Mafiotized Materialism,
- Theory of the Mafia,
- Theory of Corruption,
- Theory of Crisis Generation,
- Theory of the Degree of Trust,
- Theory of the Degree of Truth,
- Theory of Crisis Management,
- Theory and Practice of Money Laundering,
- Indicators,

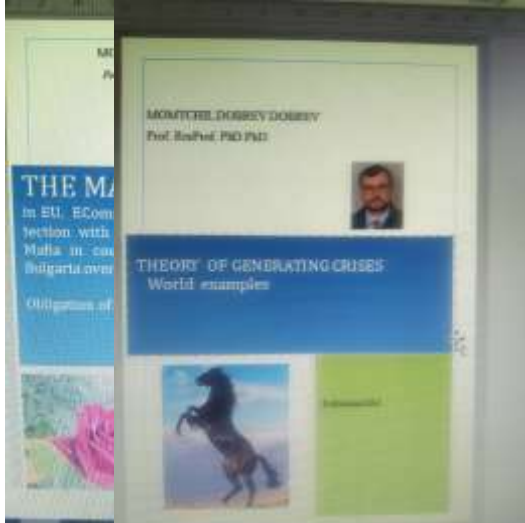

Economic laws in practice, and other theories. In collaboration with Princess Lady Prof. Mariola Garibova-Dobreva: Theory of World Domination (or domination of a state/union); Theory of Types of Sovereignty; Theory of "Valuosity" (Value-based Status) and Degrees of Values; Theory of Social Genocide; the "Centrifuge Tuner" concept; and the Theory of Socio-humanism.

One of the measures for achieving world domination and imposing a New World Order involves the use of specific pretexts—based on the "Theory and Practice of Creating Fabricated Pretexts"—which are managed and exploited by representatives of "mafia-fascism" to realize and administer their objectives: global control and the imposition of a New World Order.

The measures, procedures, and potential pretexts include the following:

- ✚ War—not merely in a single region, but in at least two: the Middle East and, currently, Ukraine.
- ✚ A pandemic.

✚ A war designed to disrupt or block supply routes—specifically those for raw materials such as oil, diesel, and gas—thereby severing the supply chains for agricultural fertilizers; this would inevitably trigger food and water crises across vast regions of the affected continents. Based on the theory and practice regarding the creation, organization, and management of pretexts or provocations by representatives of "financial-banking-

ths, means, and methods of imposing a New World Order...

this article examines only the COVID pandemic that began in artificially created biological virus serving as a catalyst for a this serves as a test run for how the initiation and orchestration of ld play out. In the process of planning a New World Order, -resource-technological-mafioso Materialism aim to seize control of sovereignty within the European Union was embedded in the eved without difficulty through directives and regulations that are y, if an EU member state fails to transpose a given directive, or... ns, fines, and legal proceedings via the Court of Justice of the tyle structure created by the "mafia-fascism" that established the European Union. Prince Lord Prof. Momchil Dobrev-Halachev and Princess Prof. Mariolaga Garibova-Dobрева developed a theory regarding the types and degrees of sovereignty, as well as the methods for seizing control of the respective sovereignties of states. During the COVID pandemic, the World Health Organization—which manages a structure representing a mafia-like materialism driven by financial, banking, resource, and technological interests—was effectively used to bloodlessly seize control of the health, political, and general sovereignty of all European Union member states; this involved managing the pandemic and mandating vaccines that had not been properly tested or undergone all mandatory trial procedures, with the ultimate goal of reducing the global population to between 500 million and 1 billion people.

Prince Lord Prof. Momchil Dobrev-Halachev and Princess Prof. Mariola Garibova-Dobрева predicted—as early as 2001–2006—the methods for seizing and controlling the sovereignty of states, both within the European Union and globally. This constitutes a step toward the imposition of a New World Order worldwide by the "Mafia-fascism" characterized by a financial-banking-resource-technological-mafioso materialism. The analysis and prediction regarding the actions of the World Health Organization and COVID-19 were also based on the following theories developed by Prince Lord Prof. Momchil Dobrev-Halachev and Princess Lady Prof. Mariola Garibova-Dobрева:

- Theory of Mafiosism,
- Theory of Financial-Banking-Resource-Technological-Mafioso Materialism,
- Theory of the Mafia,
- Theory of Corruption,
- Theory of Crisis Generation,
- Theory of the Degree of Trust,
- Theory of the Degree of Truth,
- Theory of Crisis Management,
- Theory and Practice of Money Laundering,
- Indicators,
- Economic laws in practice, and others,

...developed jointly with Princess Lady Prof. Mariola. Garibova-Dobрева –

- Theory of seizing control of the world and of a state/union,
- Theory of types of sovereignty,
- Theory of the creation and management of inequalities,
- Theory of the creation and management of poverty,
- Theory and practice of money laundering through foreign investment,
- Theory and practice of imposing sanctions for profit,
- Theory of "valuosity" and value hierarchies,
- Theory of social genocide,
- Theory and practice of the law of double standards/norms,
- Theory and practice of manufacturing pretexts,
- The Tuner Model – centrifuge,
- Theory of socio-humanism
- We also include the covers of some of the published books related to the COVID case.

IV. THEORY AND PRACTICE OF SEIZING CONTROL OF THE ENTIRE WORLD AND IMPOSING A NEW WORLD ORDER – BY PROF. MOMCHIL DOBREV AND PROF. MARIOLA GARIBOVA-DOBREVA (2006); METHODS, STRATEGIES, TACTICS, AND PLANS OF CORPORATE MASONIC MAFIA-FASCISM TO IMPOSE A NEW TYPE OF DICTATORSHIP.

In 2006, Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева developed the theory and practice regarding the seizure of the entire world and the imposition of the New World Order by representatives of "mafiotism"—of a financial, banking, resource-based, and technological "mafiotized" materialism—or, more briefly, neoliberal mafia-fascism.

The goal of imposing a NEW WORLD ORDER through a World Government includes the following: This world government will be established by the owners of global corporations linked to Masonic mafia-fascism, and by politicians groomed and created for this very purpose within those mafia-fascist circles. For decades, mafia-fascism has been cultivating its own leaders—providing training, financial backing, and induction into Masonic lodges.

Imposing a New World Order without resorting to war, financial or economic crises, or various types of revolutions—such as "yellow," "pink," or "color" revolutions, counter-revolutions, and the like. Such methods entail vast sums of money, the curtailing of freedoms and rights, and the loss of life; furthermore, they are limited in scope—restricted to specific territories, continents, or nations—while requiring immense organizational effort, the appointment of numerous personnel, significant funding for wages and other expenses, and considerable time for manipulation, propaganda, and the recruitment of operatives to carry them out. The most cost-effective option for imposing a New World Order—and fulfilling the UN's 2001 agenda—is the emergence and execution of a global pandemic.

THE PLAN – The 2001 UN document regarding the New World Order.

The comprehensive "Great Reset" plan devised by the global Masonic elite and the "deep mafia."

In reality, plans to impose a New World Order have been formulated repeatedly. Here, however, we will not mention dates or individuals involved in the imposition of the New World Order. Here we quote a statement by Henry Kissinger:

"Once the herd accepts mandatory vaccination, the game is over! They will accept anything! Control the thinking of the sheep, and you control the herd. Vaccine manufacturers are making billions, and many of you in this room today are investors. It's a huge profit! We thin out the herd, and the herd pays for the services provided for its own destruction. And now, what's for lunch?"

"They must all be vaccinated and chipped first! Then they can go outside!" – Bill Gates

At the start of the Cold War in 1947, Allen Foster Dulles—the first CIA director—stated:

"We will throw all the gold of the USA, all the might of the USA, into deceiving and stupefying the people of the socialist world. Unnoticed, we will replace human values with false ones. HOW? We will find like-minded people in those countries and in Russia. We will unleash subversive work on a massive scale; we will strip literature of its social essence; we will encourage authors who instill in people a cult of sex, violence, sadism, and betrayal—in short, immorality. We need writings that ridicule naturalness and integrity as archaic relics, while vulgarity, brazenness, lies and deceit, drunkenness and drug addiction, animalistic fear among the people, shamelessness, informing on others, and many other vices inherent in man must be..." ...set things in motion. In this way, we will destabilize generation after generation; we will bring about the erosion and corruption of the youth. We will create a person with the consumerist mindset of a mindless consumer. We will accomplish all this under the banner of 'PROTECTION OF HUMAN RIGHTS' and 'CIVIL RIGHTS'."

The New World System, according to Rockefeller, March 20, 1969.

Planned Parenthood : Population reduction, permits for childbearing, new guidelines on the meaning of sex, sex without reproduction, universal access to contraceptives, sex education for youth as a tool for a world government, state-funded abortions to reduce the population, support for homosexuality, technologies for reproduction without sex, destruction of the family unit, euthanasia and the "death pill," restricting access to paid healthcare to eliminate the elderly, strict control over access to medical services, elimination of private

physicians, difficulties in diagnosing new incurable diseases, hindering cancer treatment to reduce the population, inducing heart attacks to eliminate people, early schooling to accelerate puberty and evolution, merging all religions, abolishing old religions, altering the Bible through the revision of key terms, schooling as a tool for indoctrination, extending school hours without children actually learning anything, controlling access to information, schools as community centers, removing specific books from libraries, legislative changes unleashing social and moral chaos, supporting drug use to create an "urban jungle" atmosphere, encouraging alcohol consumption, restricting freedom of movement, the need for more prisons, use of... hospitals as places of isolation, creating psychological and physical insecurity, using crime to manage society, curbing American industrial dominance, displacing populations and economies, uprooting social foundations, using sports to reshape society, sex and violence in entertainment, implanting ID cards/microchips, controlling food supplies, controlling weather conditions, studying human behavior to instill desired responses, falsifying scientific discoveries, using terrorism as a pretext for imposing control. Television that monitors the individual; private property falling into oblivion; the advent of a new notarial system.

Here, we also quote a statement made by Muammar Gaddafi, the leader of the Libyan Jamahiriya, at the 64th session of the UN in 2009: "They will create viruses themselves and then sell you vaccines; they will pretend they need time to find a solution, even though they already have it." Rudolf Steiner – "In the past, the Spirit was abolished by decree of a church council, whereas the soul will be abolished by means of pharmacotherapy. A vaccine will easily be developed with which the organism will be treated from earliest childhood—even from birth—so as to make it utterly impossible for the human body to ever arrive at the thought: 'I know that the soul and the Spirit exist!'" GA 177/5

John Rockefeller (1839–1937), philanthropist The truth is that John Rockefeller didn't care about society at all; he viewed it merely as a source of resources! Here are his words: "We will keep their lives short and their minds weak, while pretending to do the opposite. We will use our knowledge of science and technology in subtle ways so that they never see what is happening. We will use soft metals, aging accelerators, and sedatives in their food and water, as well as in the air. They will be surrounded by poisons wherever they turn. The soft metals will cause them to lose their minds. We will promise to find a cure among our many remedies, yet we will give them even more poison.

Chemical poisons will be absorbed through the skin of fools who believe that certain hygiene and beauty products—endorsed by famous actors and musicians—will bring eternal youth to their faces and bodies; meanwhile, through their thirsty and hungry mouths, we will destroy their internal reproductive systems. Their children, however, will be born disabled and deformed, and we will conceal this information. Poisons will be hidden in everything around them—in what they drink, eat, breathe, and wear. We must be ingenious in spreading these poisons, for they are observant. We will teach them that poisons are good—using entertaining images and musical tones on television. Those who seek them out will be useful to us. We will enlist them to push our poisons. They will see our products used in movies and become accustomed to them. And..." ...they will never understand their true effect. When they give birth, we will inject poisons into their children's blood and convince them that we are helping! We will start early, while their minds are still young. We will steer their children toward what they love most—sweets. When their teeth decay, we will fill them with metals that will destroy their minds and steal their futures. Once their ability to learn has been impaired, we will create medicines that make them sick and cause other ailments, for which we will create even more medicines.

We will render them docile and weak before us; they will grow depressed and obese, and when they come to us for help, we will give them more poison. We will focus their attention on money and material possessions so that they never connect with their inner selves. We will distract them with promiscuity and external pleasures so they never become one with the universal whole. Their minds will belong to us, and they will do as we say. If they refuse, we will find ways to deploy technology that alters their minds and lives. We will use fear as our weapon. We will establish their governments and create opposition within them; we will own both sides. We will always conceal our true objective while advancing our plan. They will do the work for us, and we will prosper from their labor. Our families will never intermingle with theirs. Our blood must remain pure (for so it is). We will make them slaughter one another when they oppose us. We will keep them divided through dogma and religion. We will control every aspect of their lives, telling them what to think and how. We will guide them gently while letting them believe they are governing themselves. We will sow hostility among them through our factions. Whenever a light shines forth from their midst, we will extinguish it—be it through ridicule or death, whichever suits the occasion best. We will drive them to tear out their own hearts and kill their own children. We will achieve this by making hatred our ally and anger our friend. Hatred will blind them completely, and

they will never see that, amidst their conflicts, we are the ones leading them. They will be occupied with killing one another. They will bathe in their own blood and slaughter their neighbors, provided we perceive them as standing against us. We will benefit greatly from this, because they will not see us. For they cannot see us. We will continue to prosper from their wars and their deaths. We will repeat this until we achieve our ultimate goal. We will keep them living in fear and anger; we will feed them images and sounds. We will use every tool at our disposal to achieve this. These tools will be provided by their own labor. We will make them hate themselves and their neighbors. We will always hide the divine truth from them—that we are all one. They must never know this! They must never know that the world is an illusion. They must always believe that they are not equal. Drop by drop, step by step, we will advance toward our goal. We will seize their lands, resources, and wealth to exert control over them. We will trick them into accepting laws that steal away the little freedom they have left. We will create a monetary system that imprisons them forever, keeping them and their children in debt. When they rise up against us, we will accuse them of murder and present a different story to the world, for we will own all the media. We will use the media to control the flow of information and their emotions to our advantage. If they rise against us, we will crush them like insects—for they are lesser than insects.

They will be helpless to do anything about it. Here we cite a plan prepared by the UN, covering the period from 2021 to 2030 and dated September 21, 2001. This plan is cited by Rabbi Amnon Yitzchak.

The plan is dated September 21, 2001.

1. World Government (WG)
2. Cashless global currency
3. World Central Bank
4. Global military force
5. End of national sovereignty
6. End of private property
7. End of the family unit
8. Decimation of the population – punishment of every 10th person for disciplinary purposes
9. Control of population growth and density
10. Mandatory vaccination – for the purpose of biological control and genocide
11. Universal Basic Income; wages abolished
12. Microchip implantation for payments and surveillance
13. Social credit system
14. Surveillance and biological control device via 5G
15. Child-rearing by the WG; schools and universities owned by the WG
16. Termination of private transport – no private car ownership
17. All companies become the property of the WG
18. Restriction of air traffic
19. Concentration camps – creation of agglomeration centers
20. Elimination of irrigation systems
21. Elimination of private farming ...farms
22. Closure of private agricultural pastures
23. Elimination of single-family homes
24. Restricted use of agricultural land
25. Ban on natural remedies
26. Ban on natural treatments
27. Ban on fossil fuels

To be implemented from 2021 to 2030.

The starting point of this plan is specified as the "Coronavirus Special Operation."

In reality, this program aligns entirely with the events of 2020 and the declared COVID-19 pandemic. The actions of those in power demonstrate that they are executing this plan point by point.

❖ **This entails a new order for the economy, society, and the movement of people, capital, and goods. It includes:**

Only companies owned by the corporate figures participating in the world government are to manage the firms providing food, water, electricity, and real estate;
Mafia-controlled firms to provide rental housing;

Mafia-controlled firms to provide food supplies; Mafia-controlled firms to provide meat—primarily 3D-printed—while driving all livestock farms, meat processing plants, and meat product manufacturers into bankruptcy;

❖ **This entails a new social order, a new cultural order, and a new religious order;** In 2006, Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева formulated the "Theory and Practice of Social Genocide," which encompasses a system of genocide, terror, digital fascism, digital diktat, and dictatorship over the global population. Based on this theory, Prof. Momchil Dobrev and Prof. Mariola Garibova developed...

- ✦ This entails a new order regarding finance, monetary policy, personal payments, and settlement systems;
- ✦ This entails the cheapest option: launching, triggering, and unleashing a global pandemic;
- ✦ Birth control
- ✦ Reduction of the planet's population
- ✦ Deindustrialization – a new post-industrial society
- ✦ This involves a change in all aspects of social life – the economy, and the movement of people, capital, and goods
- ✦ Includes the weakening of industries such as tourism
- ✦ Bankruptcy of small and medium-sized enterprises
- ✦ Disruption of global supply chains
- ✦ This involves the undermining of conventional concepts of democracy
- ✦ This involves the violation of citizens' fundamental rights and freedoms
- ✦ This involves the imposition of authoritarian control and surveillance over citizens by governments
- ✦ Imposition of strict management and control over citizens—their rights and freedoms—as well as over small and medium-sized businesses
- ✦ Introduction of totalitarian control through the declaration of a state of emergency
- ✦ Complete abandonment of democracy as a social system, and the discarding of citizens' freedoms, human rights, and the previous standard of living
- ✦ Abandonment of the "market economy"
- ✦ Imposition of a different way of doing business—online business—and the strengthening of online commerce systems
- ✦ Imposition of control and regulation on key sectors
- ✦ A more controllable world through the imposition of controls and restrictions
- ✦ Asset redistribution—buying up assets at depressed valuations from companies deemed strategically important;
- ✦ Bringing economic activity to a standstill in China, Europe, and Russia—affecting all sectors, particularly manufacturing, tourism, transport, and investments in China's "Belt and Road" projects; shutting down entire enterprises and industries, especially high-tech firms in Europe and China; causing the collapse of "Factory China" and the industrial sectors of Germany, France, and Europe;
- ✦ Redirecting capital to the USA, buying up devalued assets, and transferring ownership of profitable enterprises;
- ✦ Triggering a global recession affecting the economic system and financial markets; causing a radical market slump and the collapse of stock prices for industrial giants and other major corporations, followed by their acquisition at bargain-basement prices;
- ✦ Cementing the US dollar's status as the global reserve currency;
- ✦ Attacking Europe—specifically industrial powers like Germany, France, and Italy—to trigger a recession; causing the bankruptcy of profitable enterprises within EU economies; leading to the collapse of the EU;
- ✦ Testing Europe's preparedness for military conflict;
- ✦ Testing Russia to see how it would be affected by military conflict, how it would organize itself, and what kind of resistance it would mount; bankruptcy;
- ✦ Obtaining an answer—determining whether Europe is ready for war;
- ✦ Provoking an attack on Italy – Italy signed a €40 billion contract for the construction of a port. Italy extended a contract for gas/oil imports.
- ✦ Control over human societies and all their systems—healthcare, education, economic, financial, political; imposition of controls on freedoms and movement; restrictions on travel, gatherings, and entrepreneurial activity; destruction of small and medium-sized businesses; shutting down large businesses and buying them up for a pittance; imposing a dictatorship regarding speech and assembly; population control and management; forcing nations to accept population control measures; control over capital, money, education, and healthcare.

- ✦ Redistribution of property following the destruction of small and medium-sized businesses.
- ✦ States are forced to destroy life and their own economies.
- ✦ Shutting down entire industries—especially the profitable ones—and laying off or dismissing workers.
- ✦ Creation of a new economy with new owners who have bought up devalued assets—shares, companies, and more.
- ✦ A single blow—a rapid, powerful, and effective pandemic striking many people; creating panic; a scheme to trigger financial and economic crises; increasing deficits; generating speculation; managing the population through fear and restrictions on freedoms and movement; instilling fear in the public; triggering financial crises and increasing deficits.
- ✦ Withdrawing money from circulation, creating a debt crisis, and saddling the population with debt.
- ✦ The goal is to engineer a situation requiring massive loans to tackle the pandemic, with the ultimate aim of subjugating entire nations and states within a debt spiral and forcing them to sell off their most valuable assets for a pittance.
- ✦ Ensuring that the political elite—currently beholden to the representatives of a mafia-like materialism driven by finance, banking, resources, and technology—remains in power and enacts laws that curtail rights and freedoms while disregarding democracies, constitutions, and citizens' rights.
- ✦ Orchestrating a situation where governments enact laws for total societal and population control—via phones and social networks—under the guise of public protection; this involves passing unconstitutional laws to guarantee comprehensive, all-encompassing control over the population, payment methods, financial assets, and more. Governments will adopt laws that completely restrict citizens' constitutional rights, allowing the population to be monitored without a court order or judicial ruling.
- ✦ In other words, creating the perfect conditions for imposing dictatorships—the New World Order. Enacting laws that violate human rights, fundamental constitutional rights, and civil liberties.
- ✦ Withdrawing money from circulation immediately triggers economic crises. They, in turn, inflict massive damage on entire nations. Consequently, loans are obtained.
- ✦ Increasing the deficit—to ensure dependency.
- ✦ Managing the population through fear; instilling fear among the public.
- ✦ Triggering financial, currency, and economic crises.
- ✦ Creating an "antipode" (an opposing force)—through fear and manipulation.
- ✦ Creating a machine for intrigue and a mechanism for manufacturing pretexts—for wars, conflicts, acts of aggression, and acts of sabotage.
- ✦ Triggering inflation, followed by deflation.
- ✦ Controlling resources—monetary and all other types of resources.
- ✦ The machinery of intrigue and compromising material, and the fabrication of false pretexts.
- ✦ Provoking a pretext for military intervention in a country.
- ✦ Controlling governments—not merely through finances, but by cultivating loyal government and state officials—starting from universities, global institutions, clubs, lodges, and foundations—so that they eventually become presidents, prime ministers, ministers, and heads of key agencies.
- ✦ Controlling security services and possessing compromising material.
- ✦ Controlling entire nations through debt instruments—controlling governments and states.
- ✦ Controlling money—its circulation, movement, and direction. 58/. Oversight of policy and policies being implemented
- ✦ Control of policy and the implementation of policies.
- ✦ Control of the press and media, telecommunications companies, and social networks.
- ✦ Debt-based economy and control of money. Whoever controls the money controls states, societies, nations, and governments.
- ✦ Domination over the masses, nations, and individuals.
- ✦ Control of the individual via debit and credit cards, mobile phones, and mobile applications—constant surveillance. Mobile phones and social networks.
- ✦ Control of civil society through laws banning protests, gatherings, and other activities under the pretext that people must not leave their homes, walk around the city, or visit parks and public gardens, but may only go to grocery stores and pharmacies.
- ✦ Management of the population through disease.
- ✦ Creating a scheme following the devaluation of assets—stocks, holdings, companies, and manufacturers—and their subsequent acquisition by associates of the representatives of the FBRMM.
- ✦ And a scheme to bankrupt the USA.
- ✦ Imposition and adoption of laws mandating vaccination.

- ✚ Incorporation of nanotechnology into these vaccines to control every citizen and utilize systems to crack down on citizens deemed inconvenient by governments and the global order. The following rights and freedoms are being violated:
 - ✓ Freedom of movement
 - ✓ Freedom of speech
 - ✓ Freedom of assembly
 - ✓ Freedom of religious observance
 - ✓ Freedom of entrepreneurial activity
 - ✓ Right of access to medical services and treatment
- ✚ EUROPE is closing borders. Economies are shutting down factories,
- ✚ 69/. Management and control of the finances of all citizens and their purchasing power
- ✚ 70/. Control and management of the movement of every individual citizen.
- ✚ 71/. Socialization of citizens

V. PROF. MOMCHIL DOBREV AND PROF. MARIOLA GARIBOVA-DOBREVA: THEORY OF THE TYPES AND DEGREES OF SOVEREIGNTY (2006) – THEIR INTERDEPENDENCE AND INTERCONNECTEDNESS

To characterize the types of sovereignty and the degree of a specific type of sovereignty, it is necessary for each type to be:

- ✚ Well-characterized
 - ✚ Clearly distinguishable from every other type
 - ✚ Unique
 - ✚ Original
 - ✚ Universal (The universality of sovereignty also implies that the state sovereign may legislate on every aspect of the individual's private and public life.) -Each type must be exclusive, relating to a specific country—and primarily to that country.
 - ✚ Each type must be permanently defined and established over time, relating to a specific sphere of public life; it must not be altered, replaced, or erased. Each type must remain constant over an extended period.
 - ✚ All types must encompass the entirety of the objects involved.
 - ✚ Each type must be clearly distinguishable from every other type—distinct and unique—identifying a specific area, environment, or object.
 - ✚ No type may disappear, be replaced, or be transferred to another country.
 - ✚ No type may be transferred or sold to another country.
 - ✚ Each type must be absolutely defined and distinct from all other types.
 - ✚ It must characterize the contemporary development of society, and
 - ✚ It must characterize the contemporary development of our civilization.
-
- ✓ Characterizes the majority of the world's nations.
 - ✓ Characterizes every element of our social life.
 - ✓ Characterizes every element of the development of our social life.
 - ✓ Characterizes and shapes future development.
 - ✓ Comprises 10 characteristics of sovereignty for a better understanding.
 - ✓ Possesses its own existence, which continues until the state itself ceases to exist.
 - ✓ Is grounded in the law of the state, its structure, its functioning, and the governance of both the public and private lives of the individuals who make up the society.

The characteristics of sovereignty are: permanence, exclusivity, comprehensiveness, inalienability, unity, irresponsibility, indivisibility, absoluteness, originality, and universality. A state is considered sovereign when it possesses complete autonomy over itself; it is independent of other states. The term "sovereignty" derives from the Latin word **superanus**, meaning "supreme." Although the term is modern, the concept can be traced back to Ancient Greece, where thinkers believed in the supreme authority of the state. Today, its fundamental meaning can be defined as "supreme authority over a territory." It encompasses three dimensions: the sovereign entity exercising the power; the absolute nature of sovereignty (with nothing standing above it); and its internal aspects. The state is the political institution through which sovereignty is manifested. According to the **Theory of Types and Degrees of Sovereignty** by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева, the fundamental elements of this theory consist of the following postulates:

LAW and formula by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva regarding the SOVEREIGNTY OF A STATE:

The sovereignty of a state depends on the various types of sovereignty listed below and on their respective degrees of sovereignty.

LAW OF DEPENDENCE of a SPECIFIC SOVEREIGNTY and its degree upon OTHER SOVEREIGNTY/SOVEREIGNTIES and its/their degree(s)—including direct dependence, dependence mediated by another sovereignty, and the causal dependence of one sovereignty and its degree upon another sovereignty and its degree.

LAW OF DEGREES OF SOVEREIGNTY by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva: Each type of sovereignty is characterized by its degree; furthermore, every sovereignty depends on the corresponding indicators that define it—indicators upon whose degrees that specific sovereignty relies. EACH SOVEREIGNTY is characterized by its degree of sovereignty, which depends on the corresponding indicators that define that sovereignty. SOVEREIGNTY (of a state) = The sum of the DEGREES OF SOVEREIGNTY of that state across the following types of sovereignty:

❖ **TYPES OF SOVEREIGNTY AND THEIR DEGREES**

Following a comprehensive analysis, Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva distinguish the following types of sovereignty:

National sovereignty
Sovereignty in education
Sovereignty in healthcare
Sovereignty in the political system
Sovereignty in the military sphere
Sovereignty in defense
Currency sovereignty
Financial sovereignty
Tax sovereignty
Economic sovereignty
Land sovereignty
Air sovereignty
Maritime sovereignty
Cultural sovereignty
Religious sovereignty
Food sovereignty
Energy sovereignty
Digital sovereignty
Media sovereignty
Intellectual property sovereignty
Investment sovereignty
Technology sovereignty
Sovereignty in state governance
Investment sovereignty
Sovereignty in economic policy
Sovereignty regarding ethnic groups
Sovereignty in science
Sovereignty in law
Sovereignty in the justice system

Sovereignty regarding human rights and freedoms
Foreign policy sovereignty
Domestic policy sovereignty
National security sovereignty
Climate sovereignty
Ecological sovereignty
Technological sovereignty
Production sovereignty
Consumer sovereignty
Sovereignty
Innovation sovereignty
Migration sovereignty
Financial sovereignty
Currency sovereignty
Technological sovereignty
Banking sovereignty
Legal sovereignty
Sovereignty regarding state corruption
Sovereignty regarding the mafia within the state
International legal sovereignty

Data Sovereignty

✚ **Certain types of sovereignty and the indicators determining the respective levels of these types of sovereignty**

✚ **ENERGY SOVEREIGNTY**

Energy sovereignty depends on the following indicators, which determine its level:

It concerns raw materials such as oil, gas, energy, energy carriers, and gasoline. Dependence on foreign energy sources

Degree of dependence on foreign energy sources
Availability of domestic energy sources
Ratio of domestic to foreign energy sources
Price ranges and price margins
Quantity discounts
Diversification and diversification rate
Availability of future domestic energy sources under development
Development timeline (years)
Availability of pipelines for gas, oil, hydrogen, etc.
Availability of interconnection points for gas, oil, hydrogen, etc.
Force majeure circumstances and contingency plans/options
Domestic energy generation capacities
Domestic private owners of energy generation facilities
Foreign private owners of energy generation facilities
Import of energy sources
Export of energy sources
Import of power generation equipment
Domestic power generation equipment
In-house experience, traditions, and production know-how
Dependence on foreign energy sources (raw materials such as nuclear fuel, etc.)
Security of domestic energy sources
Electricity export policy
Policy and sales ratios for domestic vs. foreign markets (exports)
State policy on protecting domestic production
State policy regarding domestic production's reliance on domestic energy generation

State policy regarding reliance on domestic vs. foreign electricity generation

Access to and availability of electricity export/import points Opportunities for electricity exports.

Opportunities for electricity imports.

State policy of protectionism.

State policy of price controls for the domestic market.

State policy of export restrictions.

State policy of import restrictions.

State policy of investment in energy sources and various major electricity producers. State policy on diversifying electricity generation across thermal, hydroelectric, nuclear, photovoltaic, wind, and water turbine sources

State policy regarding the percentage share of thermal, hydroelectric, nuclear, photovoltaic, wind, and water turbine sources in the energy mix

Dependence on the prices of imported energy resources

Political dependence on the policies of a foreign state

Vassal-like dependence on the policies of a foreign state

Interconnectedness of energy sovereignty with other forms of sovereignty

By adopting the euro, we are giving up our sovereignty in culture.

Cultural sovereignty means a state making independent decisions on how to educate its people and conduct its cultural policy—such as listening to relevant folk and national music, teaching children the relevant folk tales, and teaching people the relevant history. It means ensuring that all the elements defining the people's national identity and self-awareness—elements integral to that nation's culture—are not subjected to the massive invasion, encroachment, and displacement or replacement by a foreign culture, a process that has naturally been unfolding over the last 26 years. Cultural sovereignty depends on the following indicators, which determine its level:

Access to domestic music

Access to foreign music

Imposition of foreign music

Marginalization of domestic music

Access to domestic literature

Access to foreign literature

Imposition of foreign literature

Marginalization of domestic literature

Access to domestic folk tales

Access to foreign folk tales

Access to foreign culture

Displacement or replacement of domestic music by foreign music

Displacement or replacement of domestic literature by foreign literature

Access to foreign art – opera, operetta, dance

Access to domestic art – opera, operetta, dance, indigenous musical styles

Access to domestic art – painting, sculpture, etc.

Access to foreign art – painting, sculpture, etc.

Access to domestic film productions

Access to foreign film productions

Investment in domestic culture – films, books, painting, sculpture, art

Support for domestic culture – films, books, painting, sculpture, art

State policy on investment in and support for domestic culture

Protection of intellectual property in the cultural sphere

❖ FOOD SOVEREIGNTY

Food sovereignty depends on the following indicators, which also determine its level:

Availability of domestic agricultural production – grain, vegetables, fruit

Limited agricultural production

A system of balanced development regarding the production of grain/cereals, vegetables, and fruit – for example, an optimal approach: a producer with a maximum of 100,000 decares dedicated to grain production, of which 10% is mandatorily allocated to vegetable and fruit production (given that the production cost for vegetables and fruit is higher than for grain and cereals). A system of uneven development and distribution of agricultural land used for grain/cereal, vegetable, and fruit production

Uneven distribution of profits from grain/cereal, vegetable, and fruit production

Issues affecting vegetable and fruit production

Uneven distribution of subsidies among vegetable production, fruit production, and grain/cereal production

Lack of grain/cereal production – e.g., African nations where "orange," "yellow," or other "color revolutions" can be triggered within a week or two, leading to government overthrows

Trends in grain and cereal production

Trends in vegetable production; Trends in fruit production

Limited subsidies for fruit and vegetable production

Imports of fruits and vegetables from neighboring countries

Imports of pesticide-laden fruits and vegetables from neighboring countries

Lack of pesticide controls on imported produce

Ensuring the supply of all products needed to feed a nation's population. Political interference in problem creation; irresponsible planning and management of subsidies for the production of various goods (grain, fruit, vegetables)

Presence/absence of a pricing strategy for agricultural goods on domestic and foreign markets

Presence/absence of a strategy for exporting surplus grain, cereal crops, and other products

Presence/absence of a strategy to protect and meet consumption needs

Degree to which the population's demand for basic products is met

Full satisfaction of the population's demand for basic products

Dependence on imports of specific goods and services

Price dependence on imports of specific goods

Absence/presence of price protection for domestic production against agricultural imports

Availability/unavailability of commodity reserves

Availability/unavailability of capacity to supply goods within a specific timeframe or interval

Dependence/independence of commodity prices on exchange markets

Pricing policy for agricultural goods on the domestic market

Export policy for agricultural produce exceeding the amount required to meet the population's annual needs

Policy regarding dependence on the policies of neighboring foreign states Food sovereignty depends on the following indicators, which also determine its level:

Availability of domestic agricultural production – grain, vegetables, and fruit

Limited agricultural production

A system of balanced development regarding the production of grain/cereals versus vegetables and fruit – for example, an optimal approach involves a producer with a maximum of 100,000 decares dedicated to grain, of which 10% is mandatorily allocated to vegetable and fruit production, given that the production cost for vegetables and fruit is higher than that for grain and cereals.

A system of uneven development and distribution of agricultural land used for grain/cereal, vegetable, and fruit production

Uneven distribution of profits from grain/cereal, vegetable, and fruit production

Issues within vegetable and fruit production

Uneven distribution of subsidies among vegetable and fruit production versus grain and cereal production

Lack of grain/cereal production – for example, in African nations where "orange," "yellow," or other "color revolutions" can be triggered within a week or two, leading to government overthrows

Trends in grain and cereal production

Trends in vegetable production; Trends in fruit production

Limited subsidies for fruit and vegetable production

Imports of fruits and vegetables from neighboring countries

Imports of pesticide-laden fruits and vegetables from neighboring countries

❖ DOMESTIC POLITICAL SOVEREIGNTY

Domestic political sovereignty depends on the following indicators, which determine its extent:

Imposition/non-imposition of foreign interests in domestic policy

Limitations/lack of limitations on domestic political sovereignty

Freedom/lack of freedom in conducting domestic policies

Presence/absence of oversight by foreign states

Presence/absence of interference by foreign states

Influence/lack of influence by foreign states on domestic policy

Dependence/independence of domestic policy on foreign states/alliances

Oversight/lack of oversight of domestic policy by foreign states

Control/lack of control over domestic policy by foreign states
Imposition/non-imposition of domestic policy by foreign states
Conducting/not conducting domestic policy for the benefit of foreign states
Domestic policy subordinated/not subordinated to foreign states
Protection/lack of protection of national interests in domestic policy

❖ **FOREIGN POLICY SOVEREIGNTY**

Foreign policy sovereignty depends on the following indicators, which determine its extent:
Limitations/lack of limitations on foreign policy due to dependence on foreign states
Influence/lack of influence by foreign states on foreign policy
Dependence/independence of foreign policy on foreign states/alliances Oversight/lack of oversight of foreign policy by foreign states
Control/lack of control over foreign policy by foreign states
Imposition/non-imposition of foreign policy by foreign states
Conducting/not conducting foreign policy for the benefit of foreign states
Foreign policy subordinate/not subordinate to foreign states
Protection/lack of protection of national interests in foreign policy

❖ **SOVEREIGNTY IN EDUCATION**

Sovereignty in education depends on the following indicators, which also determine its extent:
Independent educational system
Foreign educational system
Mixed educational system
Objectives of the educational system
Assessment of the achievement of educational system objectives
Development of the educational system
Systems for assessing the knowledge of pupils and students
Trends within the educational system
System for the development of the educational system
General framework for the development of the educational system
Freedom to define the educational system
Responsibility for the educational system and culture
Policies concerning the educational system
Dependence of educational system policies on political parties and ideologies
Comparison of the educational system with those of other countries (trends, development)
Budgeting for the educational system
Budgetary trends
Economic trends driving trends in the educational system
Need for appropriately qualified personnel for industry and all other sectors of society
Political framework for defining the development scope of education at state and municipal levels
Legislative determination of policies regarding the management and development of education, culture, the arts, and science
Annual budgeting for education, science, research, and culture
Policy on increasing the budget for education, science, culture, and research for the coming year
Priority given to the development of science, education, culture, and research. Investment in education, science, research, and culture
System for supporting and investing in science, culture, education, and research
System for supporting and investing in a country's own scientific projects
System for supporting and investing in joint scientific projects involving multiple countries, alliances, or the European Union
System for increasing budgets for science, education, culture, and research
System of compulsory schooling and mandatory school attendance
System of specialized schools
System of compulsory primary education and the minimum age requirement
System of public and private schools
Highly selective educational system—selection of different types of schools (such as *Gymnasium*, *Realschule*, *Hauptschule*, or comprehensive schools) after a certain age
Student uniform policy (or lack thereof)

Systems for assessing learning outcomes for pupils and university students at various levels
Assessment systems for students of immigrant background
International educational assessment systems (at specific levels and across various disciplines: mathematics, biology, physics, chemistry, creative problem-solving—including in physics, chemistry, biology, etc.)
Vocational training systems in vocational schools
Dual education systems designed to supply businesses with a skilled workforce
Teacher and lecturer remuneration systems
Teacher and lecturer remuneration compared to average wages
Trends in teacher and lecturer salary increases
Status of teachers and lecturers (including insurance, supplementary pay, additional privileges, and protection against dismissal)
Dual education systems (combining workplace training with theoretical instruction in vocational schools)
Educational traditions (secondary and higher education) in a given country
Systems for adopting educational models or components from other countries
Processes leading to the dismantling of quality education in a country
Political systems driving the dismantling of quality education in a country
Systems fostering de-rationalization—instilling apathy, nihilism, and hatred among students
Systems of reform in education, science, culture, and research Stefan Yanev: Adopting the euro means relinquishing the last vestige of sovereignty in healthcare.
Healthcare sovereignty depends on the following indicators, which determine its extent:

Drug pricing policy
Policy regarding drugs produced domestically versus by foreign manufacturers
Price protection for drugs produced by foreign manufacturers
Creating conditions for competition among foreign pharmaceutical manufacturers
Policy on Health Insurance Fund reimbursement for medicines
Policy on Health Insurance Fund payment for treatment pathways
Policy on reimbursement for specific, designated medicines
Policy on payment for hospital treatment pathways
Policy on payment for medical referrals and referral quotas
Policy on outpatient care
Policy on inpatient care
Policy on securing modern equipment and technologies
Policy on facilitating the transfer of expertise across various medical fields
Policy on implementing the latest technologies in both inpatient care and university settings. Domestic medical education system
Foreign medical education system
Mixed medical education system
Objectives of the medical education system
Assessment of the achievement of medical education system objectives
Development of the medical education system
Student assessment systems in medicine
Trends in medical education
System for the development of medical education
General framework for the development of medical education
Autonomy in defining the medical education system
Responsibility for the medical education system and culture
Policies concerning medical education
Dependence of medical education policies on political parties and ideologies
Comparison of the medical education system with those of other countries; trends and developments in medicine
Budgeting for medical education
Trends in healthcare budgets
Economic trends driving trends in medical education
Need for appropriately qualified healthcare personnel

❖ **Digital Sovereignty**

Digital sovereignty depends on the following indicators, which determine its extent:

Capability to work with data and databases

Capability and access regarding data and databases
Limitations on access to data and databases
Systems for organizing data and databases
Proprietary vs. third-party data organization systems
Proprietary vs. third-party data systematization systems
Capability for diverse data systematization systems serving various purposes and state-level systems
Data processing speed capabilities
Data analysis capabilities
Levels of data access
Levels of data security
Level of data secrecy
Level of data encryption
Level of data access by different countries
Level of access to personal data by foreign states
Extent of data use and management by foreign states and governments
Extent to which foreign states impose data management procedures
Restrictions on the use of personal data by foreign states, entities, governments, and institutions
Level of access to foreign data
Level of data management
Data localization
Data confidentiality/non-confidentiality
Legal aspects

❖ **Data Sovereignty**

Data sovereignty depends on the following indicators, which determine its... Concept: Data is stored under the jurisdiction of the owner's state to ensure data protection rights and obligations.

Depends on local groups and data autonomy within the state.

Depends on the relationship with post-colonial states.

Depends on transnational data flows.

Depends on the use of cloud computing and technologies, as well as the relevant country's legislation regarding data control and storage.

Depends on the identity associated with data usage.

Data is subject to the laws of a specific state.

Data depends on the governance structure within the state where it is collected.

Data sovereignty is linked to data security, cloud computing, and technological sovereignty.

❖ **Tax Sovereignty**

Tax sovereignty depends on the following indicators, which determine its extent:

Tax policy – medium-term, short-term, long-term

Excise duty policy

VAT differentiation policy

VAT policy for food and goods

VAT policy for medicines

VAT policy for services

VAT policy for restaurants and hotels

VAT policy for books and culture

Income policy

Poverty policy

Income taxation policy

Taxation policy for young families and parents with children

Policy on the minimum tax-exempt income threshold

Policy regarding the shares of VAT, excise duties, and other taxes

Taxation policy for individuals

Taxation policy for corporate clients – companies and others

Policy regarding tax obligations to foreign states

Policy regarding obligations to a union

Policy regarding obligations concerning VAT and all other taxes, excise duties, etc.

❖ **Intellectual Property Sovereignty**

Intellectual property sovereignty depends on the following indicators, which determine its extent:

Access to intellectual property (or lack thereof)
Domestic intellectual property
Foreign intellectual property
Availability of access to foreign intellectual property
Prohibitions, obstacles, sanctions, embargoes, or other restrictions
Possibility of purchasing intellectual property
Possibility of acquiring intellectual property through other means
State policy
Percentage of dependence on foreign intellectual property
Domestic capacity/potential
Financing options for intellectual property (personal, own funds, foreign capital)
Availability of venture capital for intellectual property
Availability of European funding for intellectual property
Availability of other funding for intellectual property
Lead time over competing states, firms, or countries
Availability of production and technological capacity to implement innovations
Level of resource availability (own resources vs. external resources)
Percentage of dependence on foreign intellectual property
Domestic capacity/potential
Financing options (personal, own funds, foreign capital)
Speed of intellectual property implementation
Intellectual property renewal rate
percentage of proprietary patents in the specific field
importance rating of these proprietary patents
lead-time effect (coefficient)—years ahead of others
corresponding lag coefficient
rate of lagging
degree of dependence on foreign technologies
potential for catching up (percentage/probability)
years required
years of full dominance

❖ **INNOVATION SOVEREIGNTY**

Innovation sovereignty depends on the following indicators, which determine its level:

State innovation policy
State policy on incentivizing and supporting domestic innovations
State policy on incentivizing and supporting foreign innovations
Innovation financing capacity—venture capital, stock market, etc.

❖ **TECHNOLOGICAL SOVEREIGNTY –**

Technological sovereignty depends on the following indicators, which determine its level:

Available technology
Potential for developing this technology
Absence of technology
Timeframe (in years) for acquiring this technology
Possibility of acquiring it through other means
Possibility of acquiring the technology via purchase
Possibility of acquiring the technology via lease or R&D arrangement
Possibility of creating conditions for an investor who owns the technology
Available foreign technology
Potential/inability to develop this foreign technology
Prohibitions/obstacles/sanctions/embargoes/other
Percentage of dependence on foreign technologies,
percentage potential for catching up, years required, years to reach full dominance,
Dependence on foreign technologies
Presence of intelligent technological sovereignty
Full dominance

Partial percentage dominance
Percentage of dependence
Rate of new technology adoption
Rate of new technology implementation

DEGREE OF TECHNOLOGICAL SOVEREIGNTY – percentage of dependence on foreign technologies, potential for catching up, years required, years to full dominance,
Full dominance
Partial dominance (percentage-based)
Percentage of dependence

Time
Access to intellectual property
Domestic intellectual property
Foreign intellectual property
Percentage of dependence on a foreign state's intellectual property
Domestic capacity/potential
Financing opportunities – personal, internal, foreign capital
Venture capital availability
European funding opportunities
Other financing opportunities
Surpassing competitor nations and firms (timeframe)
Availability of production and technological capacity to implement innovations
Resource security (domestic vs. foreign resources)

Technological sovereignty means possessing all the technologies critical to the functioning of a government and an economy.

Otherwise, one becomes dependent on the nations that produce the technologies essential for one's existence. This leads to a form of technological colonization—currently by the USA and China. Let us call these the three circles of technological sovereignty: those centered around the USA, China, and Europe. 6. SPHERES OF INFLUENCE regarding the TYPES OF SOVEREIGNTY, GOVERNANCE, CONTROL, and OBJECTIVES of the global Masonic-mafia elite and the "Deep State" controlled by it—along with the mafia and mafia-style practices used to govern and control a foreign state.

The global Masonic-mafia elite and the Deep State govern a given state by seizing, controlling, and managing its sovereignty. The "Deep Mafia" attacks all forms of sovereignty within a state with the ultimate goal of seizing and governing it—exploiting, draining, and completely enslaving it in every possible way: economically, politically, culturally, intellectually, and otherwise.

The Deep Mafia targets the following types of sovereignty within a state to secure control and governance, and to enslave the nation—including its population, resources, territory, and assets—as follows:

- ✚ The sovereignty of the state administration. This encompasses governments, prime ministers, ministers, state agencies and institutions, local authorities, and others; control is exerted through *kompromat* (compromising material), various forms of dependency, sexual blackmail, and other coercive ties.
- ✚ The sovereignty of a state's political system. This includes the parliament, political parties, trade unions, movements, and for-profit and non-profit associations; the degradation of the political elite; and their control via compromising material (kompromat) and other forms of dependency—including sexual and other types of dependencies.
- ✚ Sovereignty regarding national security systems, secret services, and a state's intelligence agencies. Control and management of the leadership and operations of intelligence services, intelligence agencies, departments of homeland security, space intelligence, central security services, national security agencies, intelligence and counter-intelligence directorates, Ministry of Defence intelligence directorates, naval and air force intelligence services, and secret or covert services.
- ✚ Sovereignty in defense and national security, as well as airspace and maritime sovereignty; control and management of military and defense structures and the military-industrial complex.
- ✚ Sovereignty in healthcare,
- ✚ Sovereignty in education,
- ✚ Sovereignty in the social welfare system,

- ✦ Sovereignty in the economy,
- ✦ Sovereignty regarding media policy (radio, television, newspapers, magazines, and other media); control and management of these outlets through racketeering, coercion, pressure, sanctions, and other means.
- ✦ Sovereignty in the "civil sector" (civil associations, non-governmental organizations, etc.)
- ✦ Sovereignty over a state's banking and financial system
- ✦ Sovereignty in social networks and information technologies
- ✦ Sovereignty of the judicial system (judges, prosecutors, investigators) and their control through dependencies—bribes, gifts, trips, compromising material (*kompromat*), and other dependencies (sexual, gambling, etc.)
- ✦ Sovereignty of law enforcement institutions (prosecutor's office, investigative services, police) and their control through dependencies, bribes, etc.
- ✦ Financial, banking, and investment sovereignty
- ✦ Scientific sovereignty
- ✦ Cultural sovereignty
- ✦ Defense sovereignty: airspace, maritime, land, and satellite sovereignty
- ✦ Sovereignty in the military sphere and defense sovereignty
- ✦ Currency sovereignty
- ✦ Financial sovereignty
- ✦ Tax sovereignty
- ✦ Economic sovereignty
- ✦ Food sovereignty
- ✦ Energy sovereignty
- ✦ Digital sovereignty
- ✦ Media sovereignty
- ✦ Intellectual property sovereignty, investment sovereignty, technology sovereignty
- ✦ Legal sovereignty, judicial sovereignty, sovereignty regarding people's rights and freedoms
- ✦ Foreign policy sovereignty, domestic policy sovereignty
- ✦ National security sovereignty
- ✦ Climate sovereignty
- ✦ Environmental sovereignty
- ✦ Technological sovereignty, production sovereignty, consumer sovereignty,
- ✦ innovation sovereignty
- ✦ Sovereignty regarding state corruption, sovereignty regarding the mafia within the state, and international legal sovereignty.

By seizing the relevant sovereignty, the "deep mafia" overthrows regimes through "Yellow" or "Orange" revolutions and installs governments and presidents who serve the interests of the "deep state." By seizing this sovereignty, the deep mafia imposes policies on nations that align with the deep state's economic interests and profit motives. This includes imposing NATO-related policies to facilitate threats and wars against third parties (often launched from the territories of other third parties) and establishing a "New World Order" of global governance. This order is designed to make it easier for them to control states, nations, peoples, economies, production, finance, and capital. They create conditions and incite chaos through various schemes and pretexts—such as wars, refugee waves, and social, public, political, and state crises—with the ultimate goal of securing economic and financial profits and personal gain. They exercise management, control, manipulation, and the "zombification" of civil society—often through non-governmental organizations (NGOs) and their funding (e.g., Soros). They also impose military budget requirements on nations to drive arms sales from their own military-industrial complex companies and maintain control over criminal groups and syndicates. Control over commercial, military, and criminal groups within the defense industry, the financial sector, corporate media, and counter-terrorism; control and management of state funds and national budgets; imposition of globalization as an ideology; promotion of the LGBT agenda (lesbian, gay, bisexual, and transgender) as a leading state-level priority; and the use of compromising material to control individuals—such as politicians and other key figures—upon whom depend state decisions and actions affecting society as a whole. Total societal control—control of society through social media activity (Facebook, Twitter, etc.), driver's licenses, movies watched or recorded, blog activity, photos viewed or sent, police detentions, metro travel, credit and debit cards, financial information, facial recognition via surveillance cameras, emails sent and received, online searches, health records, education, travel tickets (train, bus, plane), installed and used mobile apps, traffic data, online transactions, text messages and other messages; terrorist acts perpetrated by the USA, NATO, and other military organizations; terrorist acts by private entities; ruin and collapse of the education system; destruction of national

democratic achievements; dismantling of the social welfare system; societal polarization; destruction of national values and culture; erosion of rights and freedoms; destruction of the middle class; rising poverty and inequality; increased begging; indebtedness of states and governments to the IMF, World Bank, and ECB; media dependency (TV, radio, newspapers, magazines);

Total societal control—monitoring society via social media activity (Facebook, Twitter, etc.), driver's licenses, viewing or recording of films, blog activity, viewing or sending photos, police detentions, metro travel, credit and debit cards, financial information, facial recognition via surveillance cameras, emails sent and received, online searches, health records, education, travel tickets (train, bus, plane), installed and used mobile apps, traffic data, online transactions, text messages; terrorist acts perpetrated by the USA, NATO, and other military organizations; terrorist acts by private entities; ruin and collapse of the education system; destruction of national democratic achievements; dismantling of the social welfare system; societal polarization; destruction of national values and culture; erosion of rights and freedoms; destruction of the middle class; rising poverty and inequality; increased begging; indebtedness of states and governments to the IMF, World Bank, and ECB; media dependency (TV, radio, newspapers, magazines); control and management of the drug trade by the "Black Nobility" since the 18th century; creation and management of societal inequalities; destruction of the middle class... The ultimate goal of enslaving society; creating conditions to control and manage the economies of entire nations for the sole purpose of personal profit; creating a university-bred elite—a global, mafia-like Masonic elite—to govern states and other institutions for the benefit of the Global Masonic elite; controlling and managing a nation's education system to induce intellectual decline, thereby exerting greater control over the masses and the younger generation through "zombification" and management at every level—emotional, educational, social, and otherwise; establishing a system of SOCIAL GENOCIDE; controlling and managing healthcare with the ultimate goal of reducing the global population; controlling and managing pharmaceutical development and creating population dependency on medication; controlling and managing patents and innovations, and eliminating scientists who create discoveries that could improve people's lives; controlling and eliminating scientists who develop medicines or new treatment methods that are inexpensive and threaten the elite's wealth; controlling and eliminating scientists who create zero-point energy generators and free-energy systems; controlling, managing, and producing narcotics and fostering population dependency for the sake of profit; controlling and creating GMO products and foods for profit and population reduction; controlling and managing the population through food, lethal medical practices, deadly vaccines, and psychiatric drugs... food, deadly grains, deadly sweeteners, GMOs, deadly water, air; media control and management, media capture, and propaganda serving only their own goals, ideas, aspirations, and plans—all masked by the slogan that they care about humanity and the people within it; the creation of institutions to govern nations and policies, such as the UN, UNICEF, and others; control of intelligence and secret services through Masonic operatives who serve the lodges and their personal interests rather than the laws of the respective state; propaganda and manipulation aimed at diminishing critical thinking

- increased insularity, suppression, dependency, and a sense of servitude and reliance on the decisions and actions of those in power
- turning one's back on actual facts and evidence
- dependency on propaganda
- dependency on propagated fear and stress
- rise in mental illnesses
- rise in drug abuse
- rise in homelessness
- rise in unemployment
- rise in malnutrition
- rise in incurable malignant diseases
- rise in theft
- rise in crime
- rise in murders
- rise in business bankruptcies
- reduction in life expectancy /

THEORY OF TYPES AND LEVELS OF STRESS – 2009 Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva: control exercised by a global, mafia-like Masonic elite over every state and its governance through the control and management of the respective state's special and secret services; control by the global, mafia-like Masonic elite over all Masonic lodges and similar organizations worldwide; and the control and management—

by "deep state" structures—of the selection, election, and appointment of presidents, prime ministers, and chancellors in the respective countries.

The global, mafia-like Masonic elite, along with the "deep state" it controls and that entity's representatives, operate as a government.

The global Masonic-mafia elite and the "deep state" it controls disregard the rights, freedoms, and constitutions of individual nations, as well as the treaties establishing unions such as the European Union. In reality, the global Masonic-mafia elite and the deep state under its control employ the following undemocratic models of governance:

- Autocracy
- Oligarchy
- Plutocracy
- Kleptocracy
- Corporatocracy
- Cryptocracy

All these systems of state governance operate based on the principles of mafia-style rule and a mafia-like materialism driven by financial, banking, resource, and technological power. Mafia-style practices and "Financial-Banking-Resource-Technological Mafia-style Materialism" – the ideologies of the global Masonic mafia-style elite and the Deep State. Principles of mafia-style practices and "Financial-Banking-Resource-Technological Mafia-style Materialism" – a new form of state governance serving private and personal interests; the ideology of the global Masonic mafia-style elite and the Deep State controlled by it, operating for the benefit of that elite.

Differences compared to fascism and mafia-style systems. State capitalism is a system in which the state replaces private entrepreneurs in their role as capitalist agents. Under state capitalism, all property and means of production are concentrated in the hands of a single capitalist—the state—which is usually governed by a party leadership and a party *nomenklatura*. The value added through production is redistributed by this sole capitalist—the state. Such systems are often labeled as either socialist or communist. It is often argued that the countries of the socialist bloc were neither "people's" states nor truly social in nature, and that their economic system was effectively state capitalism. Capitalism is an economic system in which production and trade are privately owned and managed according to market economy methods, which in turn follow the principles of supply and demand. The primary driving force in such a system is—ostensibly—competition.

Fascism advocates the idea of a one-party state. It holds that nations and races are in constant conflict, and fascist governments ban and suppress criticism and opposition directed at them. They are opposed to class conflict.

Fascism is a form of government—resembling Mussolini's regime—that elevates the nation and race above the individual, establishes a one-party system, promotes nationalism, imposes strict economic and social control, and employs violence and censorship.

The state is governed by a prime minister (in the case of a parliamentary republic) who installs and controls every state institution—ministries and state agencies—and directs both the executive and judicial branches through appointments of close associates, while also controlling the legislative branch—the parliament.

Under "mafiotism," the people are viewed merely as a mob. The principles of mob rule involve suppressing the masses so that they are driven by base passions. Creating problems for the "crowd"—the people—through taxes, high prices, high bank service fees, and the management of the middle class's disposable funds; in this way, through cunning and hypocrisy, the greatest human virtues—openness and honesty—are suppressed, as the mafia mentality views them as vices.

The governance of law—where the law begins and where it ends.

The weakening of the force of laws, "liberalism" and "rights,"

The right of the strong,

Intervening to abolish all existing regulations and decrees.

The mafia seizes control of the laws and restructures institutions; what is deemed necessary and useful serves only its own goals and ambitions.

FORMULA OF MAFIOTISMUS

The simplest model of the mafia, describing the factors influencing its scale, nature, and characteristics, is as follows:

MAFIOTISMUS = Personal/Group (covert or overt) Power (over state institutions, the state, etc.) + Influence + Connections (to individuals, private companies) + Interests (personal, private, corporate) + ORDER/ORDERS + Personal management of all levels of the state + Personal control of all levels of the state (mafia structure—internal or external) + Monopoly rights + Laws/rules/practices/procedures + Possibility of making alternative decisions (minus obligations, responsibilities, and morality/ethics) + Personal management and control of the distribution of public state financial and other resources (including European funds and assets).

❖ **In reality, by seizing control of health sovereignty through the World Health Organization during the 2020 COVID crisis, all forms of sovereignty belonging to all WHO member states were effectively taken over.**

❖ **A prime example of the total seizure of all forms of sovereignty is the state of Bulgaria, which is governed by the mafia—since those who actually run it are mafia operatives.**

Bulgaria has long been controlled—ever since 1991—by the USA and US structures, both covert and otherwise. Following Bulgaria's accession to the European Union, the country has also had all forms of its sovereignty seized by the European Commission mafia. In Bulgaria, there are no laws that are actually enforced by judges, prosecutors, statesmen, ministers, or prime ministers.

There are no laws and no respect for human rights; instead, there is racketeering, coercion, and extortion carried out through various state structures—targeting both individuals and businesses—and there are even contract killings.

❖ **To date, Prince Lord Prof. Momchil Dobrev-Halachev has survived 21 attempts on his life ordered by the mafia—involving state officials and mafia bosses—because, in the words of MAFIA boss General Lyuben Gotsev (2006): "Momchil Dobrev is a man of honor, and we can never buy him off!" 10. By usurping a nation's sovereignty, the "deep mafia" overthrows regimes—orchestrating "Yellow" or "Orange" revolutions and installing governments and presidents who serve the interests of the deep state.**

By seizing sovereignty, the deep mafia imposes policies on nations that align with the deep state's economic interests and profit motives. This includes leveraging NATO to threaten or wage war against third parties using the territories of other nations, and imposing a "New World Order" of global governance that facilitates easier control over states, nations, peoples, economies, production, finance, and capital. They create conditions and incite chaos through various schemes and pretexts—such as wars, refugee waves, and social, political, or economic crises—all with the ultimate goal of generating profit (economic and financial gain) and securing power, control, manipulation, and the "zombification" of civil society via NGOs and their funding (e.g., Soros). They also mandate specific military budget requirements for nations to drive arms sales from their own military-industrial complex companies and exercise control over criminal groups and syndicates. Control over commercial, military, and criminal groups within the defense industry, the financial sector, corporate media, and counter-terrorism; control and management of state funds and national budgets; imposition of globalization as an ideology; promotion of the LGBT agenda (lesbian, gay, bisexual, and transgender) as a leading state-level priority; and the use of compromising material to control individuals—such as politicians and other key figures—upon whom depend state decisions and actions affecting society as a whole. Total societal control—monitoring society via social media activity (Facebook, Twitter, etc.), driver's licenses, viewing or recording of films, blog activity, viewing or sending photos, police detentions, metro travel, credit and debit cards, financial information, facial recognition via surveillance cameras, emails sent and received, online searches, health records, education, travel tickets (train, bus, plane), installed and used mobile apps, traffic data, online transactions, text messages; terrorist acts perpetrated by the USA, NATO, and other military organizations; terrorist acts by private entities; ruin and collapse of the education system; destruction of national democratic achievements; dismantling of the social welfare system; societal polarization; destruction of national values and culture; erosion of rights and freedoms; destruction of the middle class; rising poverty and inequality; increased begging; indebtedness of states and governments to the IMF, World Bank, and ECB; media dependency (TV, radio, newspapers, magazines); control and management of the drug trade by the "Black Nobility" since the 18th century; creation and management of societal inequalities; destruction of the middle class... ..the ultimate goal

of enslaving society; creating conditions to control and manage the economies of entire nations solely for personal profit; cultivating a university-bred elite—a global, Masonic, mafia-like elite—to govern states and other institutions for the benefit of the global Masonic elite; controlling and managing a nation's education system to dumb down the population; exerting greater control over the masses and the younger generation to "zombify" and manipulate them at every level—emotional, educational, social, and otherwise; and establishing a system for...

Establishing a system of SOCIAL GENOCIDE; controlling and managing healthcare with the ultimate goal of reducing the planet's population; controlling and managing the pharmaceutical development system and creating population dependency on drugs; controlling and managing patents and innovations, and eliminating scientists who create discoveries that could improve people's lives; controlling and eliminating scientists who develop new, inexpensive treatment methods that threaten the elite's wealth; controlling and eliminating scientists who create zero-point and free-energy generators; controlling, managing, and producing narcotics to create population dependency for the sake of profit; controlling and creating GMO products and foods for profit and population reduction; controlling and managing the population through food and lethal medical practices—including deadly vaccines, psychiatric drugs, food, grain, sweeteners, GMOs, water, and air; controlling and dominating the media to propagate only their own goals, ideas, aspirations, and plans, all while masquerading behind the slogan that they care about humanity and the people within it; establishing institutions—such as the UN, UNICEF, and others—to govern nations and policies; and controlling intelligence and secret services through Masonic operatives who serve the lodges and their personal interests rather than... ..the laws of the respective state,

Propaganda and manipulation aimed at diminishing critical thinking:

- increased insularity, repression, dependency, and a sense of servitude and reliance on the decisions and actions of those in power
- turning one's back on actual facts and evidence
- dependency on propaganda
- dependency on propagated fear and stress
- rise in mental illnesses
- rise in drug abuse
- increase in the homeless population
- increase in unemployment
- increase in the number of undernourished people
- rise in incurable malignant diseases
- increase in thefts
- increase in crimes
- increase in murders
- increase in business bankruptcies

- ❖ **reduction in life expectancy / THEORY OF TYPES AND LEVELS OF STRESS – 2009, Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева; control exercised by a global, Masonic, mafia-like elite over each state and its governance through the control and management of the respective state's special services and secret agencies; control by the global, Masonic, mafia-like elite over all Masonic lodges and similar organizations worldwide; control and management of the selection, election, and appointment of presidents, prime ministers, and chancellors in the respective states by "deep state" structures. The global, mafia-like Masonic elite—along with the "deep state" it controls and its representatives—operates as a shadow government.**

This global, mafia-like Masonic elite and the deep state it controls disregard the rights, freedoms, and constitutions of individual nations, as well as treaties establishing unions such as the European Union.

VI. CONCLUSION

The briefly outlined theory regarding the types and degrees of sovereignty provides a foundation for protecting a state so that it does not lose its sovereignty, nor fall victim to colonization, conquest, and destruction by another nation, the "deep mafia," or the deep state.
